Data Notes

- Hearing Screening and Follow-up Survey data reflect information that states and territories have reported documented without estimation. As a result, data reported by CDC EHDI may differ from other sources.
- Some respondents only provided partial data (e.g., hearing screening data only). As a result, the number of reporting states and territories and denominators varies for some of the data sections.
- These data are subject to change if additional states and/or territories report data for year 2017.
- In Process: Respondents were advised that to be reported in this category, each infant must have been seen for diagnostic testing at least one time and have a follow-up appointment already scheduled.
- LFU (Loss to Follow-up) / LTD (Loss to Documentation): Sub group of “No Documented Diagnosis / Undetermined” and “No Intervention Services / Undetermined.” Includes cases where infants’ families were Contacted but Unresponsive, Unable to Contact, and Unknown.
