

SET-NET SUCCESS STORY, NEW YORK STATE – Audio Description Transcript

When New York needed to understand how COVID-19 was impacting pregnant people and their babies, health officials used SET-NET data.

They built partnerships to get data faster, so that public health officials are ready and prepared to meet the needs of pregnant people and babies during emergencies.

Now, New York is better equipped to keep families safe from emerging health threats.

“One outcome of the COVID pandemic has been that everybody realizes just how important it is to work together.” - Nicole Longcore, Evaluation Specialist, New York State Department of Health

SET-NET: Working Together to Protect Pregnant People and Babies
