You are invited to learn more about testing of air quality in FEMA-supplied trailers and mobile homes.

CDC will host public availability sessions to discuss the findings of their study on formaldehyde in FEMA-supplied trailers and mobile homes.

**A 30-minute presentation will be given at the start of each session.**

A public availability session is an informal meeting where community members can talk one-on-one with CDC scientists about health concerns.

The following topics will be discussed

- results of testing conducted from December 21, 2007 until January 22, 2008,
- how the tests were conducted, and
- other health-related information.

FEMA will also be at each of the sessions to provide information about the relocation of FEMA-supplied trailer and mobile home residents to other housing.

**Date:**
February 25
February 26
February 26
February 27
February 27
February 28

**Time:**
6pm - 8pm
