Journal of Environmental Health Features Tools Developed by CDC Capacity-Building Grantees

The Centers for Disease Control and Prevention (CDC)/National Center for Environmental Health provides funding and technical assistance to public health agencies, associations, and universities to establish programs for developing a competent and effective environmental health services workforce.

Products and processes developed by the grantees are designed to be models and/or toolkits that can be used by other environmental health programs. These tools are used to:

- deliver environmental health services
- improve environmental health capacity to respond to current and emerging health threats
- expand the science base in environmental public health to improve public health practice.

To further disseminate these tools, the July—August 2007 Journal of Environmental Health featured articles written by capacity-building grantees:

- Using 10-Essential-Services Training to Revive, Refocus, and Strengthen Your Environmental Health Programs—Carl S. Osaki, R.S., M.S.P.H., Deborah Hinchey, M.P.H., and Joy Harris, M.P.H.
- Building Capacity of Environmental Health Services at the Local and National Levels with the 10-Essential-Services Framework—Lynn Schulman George, Mark Fulop, M.A., M.P.H., and Lila Wickham, R.N., M.S.
- The Use of the National Public Health Performance Standards to Evaluate Change in Capacity to Carry Out the 10 Essential Services—G. Barron, M.P.H., J. Glad, M.P.H., and C. Vukotich, M.S.
- Using the PACE EH Model to Mobilize Communities to Address Local Environmental Health Issues—A Case Study in Island County, Washington—Keith Higman, Celine Servatius, R.E.H.S., Whitney L. Webber, M.S., and Tim McDonald, R.S., M.P.H.

JEH to Feature CDC Capacity-Building Grantees’ Tools, Continued

Guest Commentaries
The journal also included two commentaries by capacity-building grantees:

- It Takes More than Science—Ken Sharp, R.E.H.S., and Joy Harris, M.P.H.

- Optimizing Environmental Health Training Outcomes: A Case Study of Tribal and Nontribal Trainees—Sarah Hess, M.P.H.(C), David T. Dyjack, Dr.P.H., C.I.H., and Jesse Bliss, M.P.H.
