

**STINGING CATERpillARS:  
PICTORIAL KEY TO SOME IMPORTANT UNITED STATES SPECIES**  
Harold George Scott & Chester J. Stojanovich

WITH DORSAL SADDLE

WITHOUT DORSAL SADDLE

BODY FUR-LIKE

BODY NOT FUR-LIKE

**SADDLEBACK CATERPILLAR**  
*Sibine stimulae*

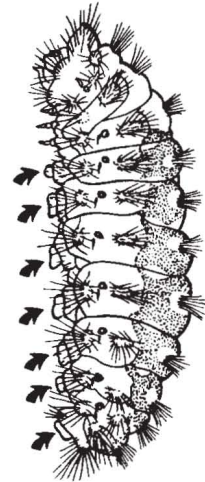

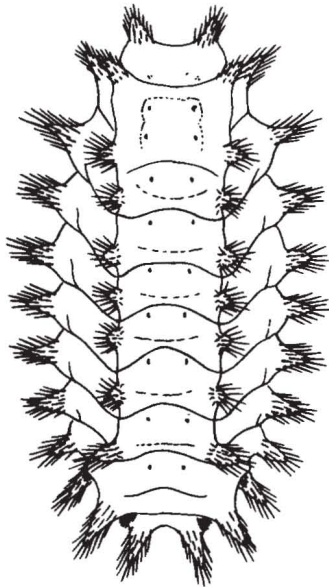

**PUSS CATERPILLAR**  
*Megalopyge opercularis*

5 PROLEGS

7 PROLEGS

ABOUT 3/4-INCH LONG,  
YELLOWISH GREEN

ABOUT 2 INCHES LONG,  
RED AND WHITE

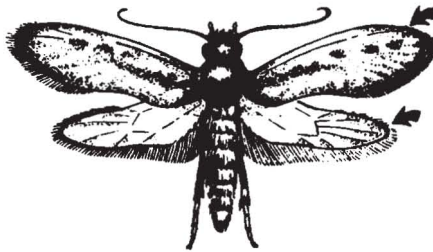

**A SLUG CATERPILLAR**  
*Euclea chloris*

**IO MOTH CATERPILLAR**  
*Automeris io*

**A FLANNEL MOTH CATERPILLAR**  
*Norape cretata*

**MOTHS: KEY TO SOME SPECIES COMMONLY ASSOCIATED WITH STORED FOOD**  
**Harold George Scott**

1. Caterpillars ..... 2  
 Adult moths ..... 5
  
2. Pinkish larvae up to 3/5-inch long living in silken tubes and producing matter webbing in the infested food (*Anagasta kuhniella*) .....  
 ..... **MEDITERRANEAN FLOUR MOTH**  
 Whitish larvae with or without black or orange markings ..... 3
  
3. Black head and prothorax; orange markings at both ends of the body; living in silken tubes (*Pyrallis farinalis*) ..... **MEAL MOTH**  
 Without black head and prothorax ..... 4
  
4. White to greenish-white larvae producing matter webbing in the infested food (*Plodia interpunctella*) ..... **INDIAN MEAL MOTH**  
 Whitish; not producing matted webbing; living inside kernels of grain (*Sitotroga cerealella*) ..... **ANGOUMOIS GRAIN MOTH**
  
5. Wings unicolorous to slightly spotted; long fringe at rear of wings (*Sitotroga cerealella*) ..... **ANGOUMOIS GRAIN MOTH**  
 Wings heavily dark marked ..... 6
  
6. Distal half of front wings dark; basal half light (*Plodia interpunctella*) ..... **INDIAN MEAL MOTH**  
 Wings not so marked ..... 7
  
7. Basal and distal thirds of front wings dark; middle portion of front wings light (*Pyrallis farinalis*) ..... **MEAL MOTH**  
 Front wings pale gray with transverse wavy black markings (*Anagasta kuhniella*) ..... **MEDITERRANEAN FLOUR MOTH**

Angoumois Grain Moth
