“Readiness in Partnership”

Empowering Faith-Based/Community Groups
to develop a national culture of readiness.

October • 28-29 • 2009

Sheraton Atlanta Hotel • 165 Courtland Street, NE, Atlanta, Georgia • 30303

The Centers for Disease Control and Prevention (CDC's) **National Center for Environmental Health (NCEH), Lead Poisoning Prevention/Healthy Homes Branch (LPP/HHB)** has expanded its mission from a single focus on childhood lead poisoning prevention to an expanded approach designed to support home features that improve the quality of life throughout the entire home. CDC invites **Faith-based/Community Organizations (FBCO)** to build partnerships that involve community members in developing lead poisoning prevention and healthy homes strategies. Everyone can work toward making safe, healthy, and affordable homes part of the nation's public health planning.

The meetings will focus on **equipping grantees, partners, and potential partners** in: Understanding misconceptions of separation of church and state; how to effectively partner; organizational competency; where to find resources; understanding how to create impact measures, and gain information on how to help build ideas for FBCO response to health related issues. Best practices/ Lessons learned.

OCTOBER 28, 2009

2:00p – 4:00p
