

Download options

The entire report in Microsoft Word format with supporting Excel spreadsheets is available for download. The file compressed is 26 Mbytes, so this is not recommended if you do not have a high speed Internet connection. Click [HERE](#) to download the entire report to your computer.

There are some hyperlinks to Excel spreadsheets within the report. All links to the Internet version of the report bring the user to this page, where there is a link for downloading the support files (4.4 Mbytes). CDC chose this option for the Web version for two reasons:

- (1) Excel spreadsheets are not consistently displayed by all versions of all browsers.
- (2) None of the browsers allow the user to view the algorithms embedded in the spreadsheet cells, a feature requested by several readers.

Click [HERE](#) to download just the support files.
