WEST VIRGINIA	\$2,037,899
WISCONSIN	\$6,803,564
WYOMING	\$1,571,071
TOTAL	\$217,846,622

Over \$200M Awarded to 64 Domestic Public Health Departments in Federal Fiscal Year 2018

(8/1/2018 – 7/31/2019)

The goal of the Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) program is to reduce illness and related deaths caused by a wide range of infectious disease threats. The ELC program accomplishes this by administering one of CDC's key nationwide cooperative agreements, awarding approximately \$200 million dollars annually. ELC provides funding, strategic direction, and technical assistance to 64 jurisdictions for surveillance, detection, response, and prevention. For nearly a quarter-century, ELC has provided direct support to health departments in all 50 states, several large cities, and U.S. territories, ensuring continuity of operations for the nation's infectious disease-related infrastructure.

www.cdc.gov/ELC

NOTE: Final summary of financial assistance (update effective: 1/30/19).

*This table reflects update to include additional funds provided to jurisdictions in response to need for additional AFM surveillance support. Amounts also include funds from annual appropriations and Recipient carryover funds (which may include supplemental appropriations) awarded to grantees for this budget period
