TB Slide Set, 2016 Surveillance Data

NCHHSTP AtlasPlus

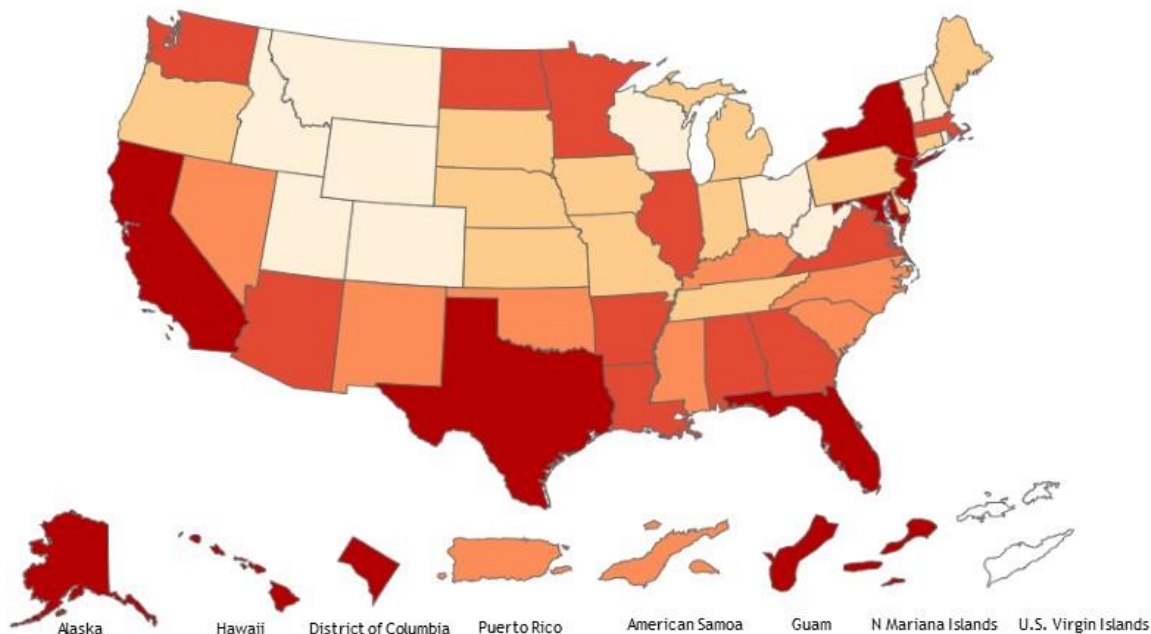

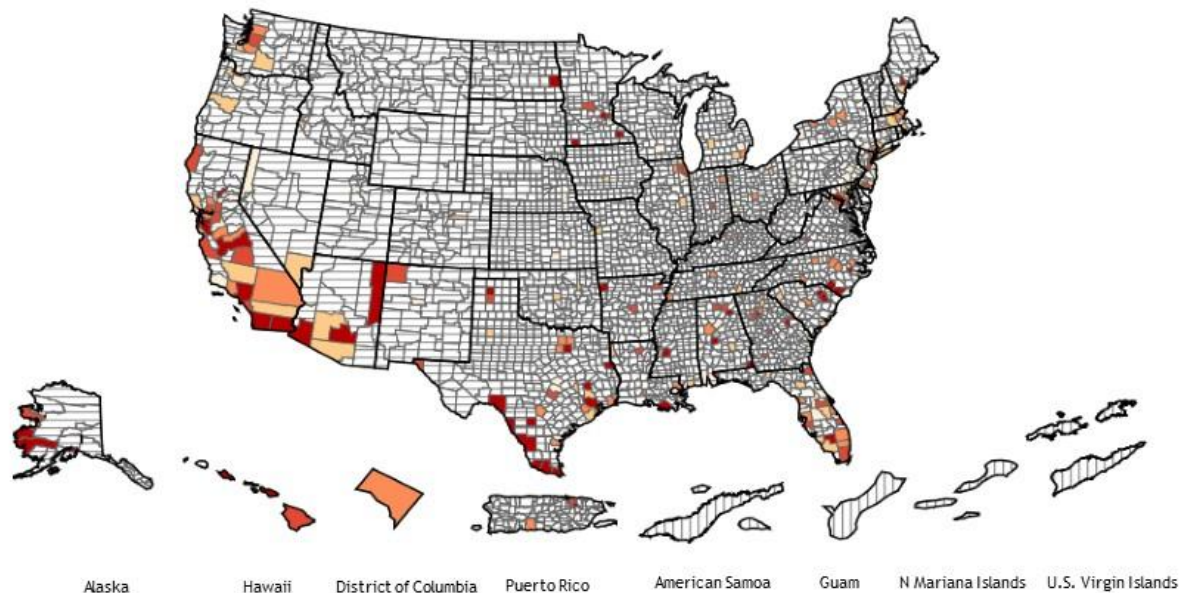

National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention

The **NCHHSTP AtlasPlus** is an online, interactive tool that gives you the power to analyze, map, and create tables using HIV, viral hepatitis, STD, and TB data that are reported to CDC.

Using the **NCHHSTP AtlasPlus**, you can:

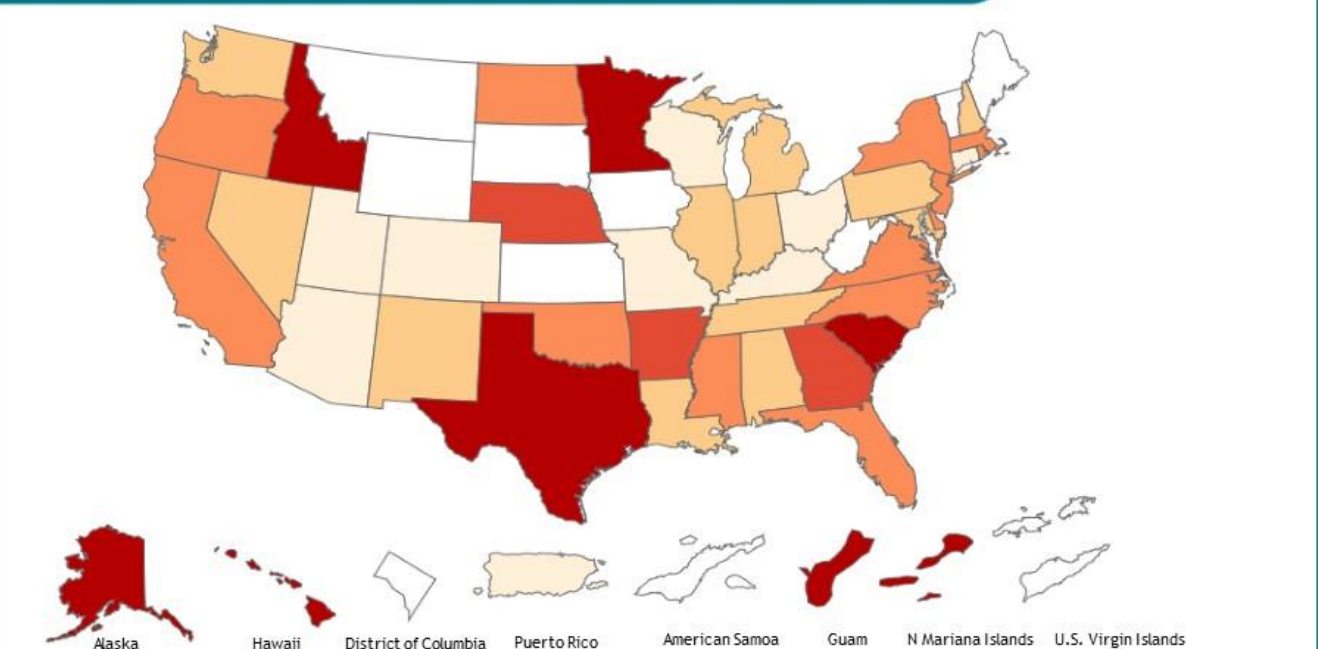

- Create custom maps and bar graphs using HIV, viral hepatitis, STD, or TB data (**NCHHSTP AtlasPlus** has 15 disease variables to explore);
- View a list of diagnoses for most recent year and change from the previous year;
- Create 2 side-by-side maps or charts (e.g., 2 diseases, 2 race/ethnicity groups, or 2 age groups);
- Display changes over time and patterns across the United States (**NCHHSTP AtlasPlus** has 16 years of data for most variables);
- Generate charts:
 - Line graphs by year
 - Pie charts for sex
 - Bar charts for age, race/ethnicity, transmission category (HIV), U.S.-born and non-U.S.-born (TB)
 - Bar charts for state and country; and,
- Download data and export graphics.

Rate per 100,000 among selected population

Disclaimer: This is a user-generated report. The findings and conclusions are those of the user and do not necessarily represent the views of the CDC.

Notes: Rates per 100,000 population were calculated for TB. Population denominators used in calculating TB rates were based on the US Census population estimates. For more info, see: [TB Surveillance Technical Notes](#). Suggested citation: [NCHHSTP AtlasPlus](#). Accessed on 12/21/2017 1:32 PM.
