The Centers for Disease Control and Prevention's National Center for Health Statistics (NCHS) is conducting the National Ambulatory Medical Care Survey (NAMCS). This annual study, which has been in the field since 1973, collects information about the large portion of ambulatory care provided by physicians and advanced practice providers throughout the United States. Research using NAMCS helps to inform physicians, health care researchers, and policy makers about the changing characteristics of ambulatory health care in this country. The information that we will request includes data about patient visits (e.g., demographics, diagnoses, services, and treatments); physician practice characteristics (e.g., total physicians at community health center); and use of electronic health records.

Many organizations and leaders in the health care community, including those providing the enclosed letter of endorsement, have expressed their support and join me in urging your participation in this meaningful study. You will be asked to allow the abstraction of a sample of about 30 patient encounters during a randomly assigned, 1-week reporting period. Additionally, there is a short interview (approximately 30 minutes) with you about the nature of your practice. We intend to conduct additional health care research by linking National Provider Identifiers (NPIs) and Federal Tax Identification Numbers collected in this study to health care-related data such as Medicare records. In the weeks following the completion of this study, you may be contacted again for a 15-minute reinterview, which is conducted as a quality measure. Participation is voluntary, and you or your staff may refuse to answer any question or stop participating at any time without penalty or loss of benefits.

The following are some key points about the survey:

- Data collection for NAMCS is authorized by Section 306 of the Public Health Service Act (Title 42, U.S. Code, 242k).
- All information collected will be held in confidence according to Section 308(d) of the Public Health Service Act (Title 42, U.S. Code, 242m(d)) and the Confidential Information Protection and Statistical Efficiency Act (Title 5 of PL 107–347). This information will be used for statistical purposes only. No patient names, social security numbers, or addresses are collected.

- In addition, NAMCS conforms to the Privacy Rule (45 CFR Part 160 and Subparts A and E of Part 164) as mandated by HIPAA (Public Law 104–191) because disclosure of patient data is permitted for public health purposes, and the NCHS Research Ethics Review Board has approved NAMCS.
- U.S. Census Bureau employees, who administer the study, are required by law to keep all information about your practice and patients confidential.
- Disclosure of this information is also subject to all of the published routine uses as identified in the Privacy Act System of Records Notice 09-20-0167 Health Resources Utilization Statistics.

A Census Bureau employee, acting as our agent, will call you to schedule an appointment regarding the details of your participation. If you have any questions, please call a NAMCS representative at 1–800–392–2862. You can also find additional information on the survey by visiting the NAMCS participant website at: https://www.cdc.gov/nchs/ahcd/namcs_participant.htm.

You may have questions about your rights as a participant in this research study. If so, please call the Research Ethics Review Board at 1–800–223–8118. Please leave a brief message with your name and phone number and say that you are calling about Protocol 2016–03. Your call will be returned as soon as possible.

We greatly appreciate your cooperation.

Sincerely,

Jennifer Madans, Ph.D.
Acting Director
