As it relates to the HPV vaccine, how often does your clinic –

1. determine who should get the HPV vaccine?
   - Mark (X) one interval for routine screening.
   - No routine interval recommended

   a. Conventional Pap test (Definition – Smear spread on glass slide and fixed)
      - Yes – How often does this clinic routinely screen women using this method?
        - No
        - Unknown
        - Continue with item 1b

   b. Liquid-based cytology (Definition – Specimen suspended in liquid solution)
      - Yes – How often does this clinic routinely screen women using this method?
        - No
        - Unknown
        - Continue with item 1c

   c. Other – Specify

2. Does this clinic perform colposcopy?
   - Yes
   - No
   - Unknown
3a. Does this clinic ever order or collect the Human Papillomavirus (HPV) DNA test?

- Yes – Go to item 3b
- No – SKIP to item 3c

b. Which of the following HPV DNA tests are ordered or collected in this clinic? Mark (X) all that apply.

- High risk (HR) HPV DNA test
- Low risk (LR) HPV DNA test
- Type-specific HPV DNA test
- Unknown

3c. Why is the HPV DNA test not ordered or collected in this clinic? – Mark (X) all that apply.

- This clinic does not see the types of patients for whom the HPV DNA test is indicated.
- This clinic uses other tests, procedures, or examination methods to manage patients for whom the HPV DNA test is indicated.
- The patients in this clinic have timely access to colposcopy.
- Assessing patients’ HPV infection status is not a priority at this clinic.
- The labs affiliated with this clinic do not offer the HPV DNA test.
- The health plans or health systems affiliated with this clinic do not recommend the HPV DNA test.
- The HPV DNA test is not a reimbursed or covered service for most patients in this clinic.
- Discussing cervical cancer screening in the context of an STD is avoided in this clinic.

4a. If a patient’s Pap test result is borderline or abnormal, does this clinic routinely order an HPV DNA test to be performed on that sample (commonly called reflex HPV DNA testing)? (An HPV DNA test may be run on the same liquid-based medium as the Pap test or an HPV DNA test specimen may be collected at the same time as the conventional Pap test.)

- Yes – Go to item 4b
- No
- Unknown

b. For which borderline or abnormal Pap test result would this clinic recall a patient for an HPV DNA test? Mark (X) all that apply.

- ASC-US (atypical squamous cells of undetermined significance)
- ASC-H (atypical squamous cells of undetermined significance – cannot exclude high-grade intraepithelial lesion)
- LSIL (low-grade squamous intraepithelial lesion, encompassing mild dysplasia/CIN1)
- HSIL (high-grade squamous intraepithelial lesion, moderate dysplasia/CIN2, severe dysplasia/CIN3, and carcinoma in situ)
- AGC (atypical glandular cells)

5a. Does this clinic routinely recall patients to come back for a second sample collection for an HPV DNA test if their Pap test is abnormal or borderline (recall testing)?

- Yes – Go to item 5b
- No
- Unknown

b. For which abnormal or borderline Pap test result would this clinic recall a patient for an HPV DNA test? Mark (X) all that apply.

- ASC-US (atypical squamous cells of undetermined significance)
- ASC-H (atypical squamous cells of undetermined significance – cannot exclude high-grade intraepithelial lesion)
- LSIL (low-grade squamous intraepithelial lesion, encompassing mild dysplasia/CIN1)
- HSIL (high-grade squamous intraepithelial lesion, moderate dysplasia/CIN2, severe dysplasia/CIN3, and carcinoma in situ)
- AGC (atypical glandular cells)
6a. Does this clinic routinely order or collect an HPV DNA test at the same time as the Pap test as part of routine cervical cancer screening (commonly called adjunct HPV testing or cotesting)?
- Yes – Go to item 6b
- No – SKIP to item 7
- Unknown

b. For which patients does this clinic routinely order or collect an HPV DNA test along with the Pap test (commonly called adjunct HPV testing or cotesting)? Mark (X) all that apply.
- Women under 21 years old
- Women 21 years old to 29 years old
- Women 30 years old and over
- Women who request the test for cervical cancer screening
- Women who request the test to check their HPV infection status
- Other – Specify

7. Given the following screening histories, when would this clinic recommend that a woman between 30 and 60 years of age return for her next Pap test?

<table>
<thead>
<tr>
<th>Prior Pap test results in past 5 years (excluding current normal results)</th>
<th>Current HPV DNA test results</th>
<th>For each of the following scenarios, mark (X) only ONE for each row.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Current Pap test result</td>
</tr>
</tbody>
</table>

(a) Two consecutive normal Pap tests
- Has not had test
- Negative
- Positive

(b) Two consecutive normal Pap tests
- Has not had test
- Negative
- Positive

(c) Two consecutive normal Pap tests
- Has not had test
- Negative
- Positive

(d) Has not had a Pap test
- Negative
- Positive

(e) Has not had a Pap test
- Negative
- Positive

(f) Abnormal Pap test
- Negative
- Positive

(g) Abnormal Pap test
- Negative
- Positive

QUESTIONS 8-14 ASK ABOUT THE HPV VACCINE

8. How often does this clinic use an HPV test to determine who should get the HPV vaccine? Mark (X) only one.
- Rarely or never
- Sometimes
- Usually
- Always or almost always
- Do not recommend the HPV vaccine – SKIP to item 10.
9. As it relates to the HPV vaccine, how often does your clinic –
   (Mark (X) only ONE for each row.)
   | Rarely or never | Sometimes | Usually | Always or almost always | Unknown/Not applicable/ Do not ask |
---|---|---|---|---|---|
| a. Use the number of sexual partners to determine who should get the HPV vaccine? | | | | | |
| b. Perform a Pap test to determine who should get the HPV vaccine? | | | | | |
| c. Recommend the HPV vaccine to females with a history of an abnormal Pap test result (ASC-US or higher)? | | | | | |
| d. Recommend the HPV vaccine to females with a positive HPV test? | | | | | |

10. Will this clinic's cervical cancer screening and management procedures change for females who have been fully vaccinated with the HPV vaccine?
   | Yes | No – SKIP to item 14 |

11. How often will this clinic routinely screen for cervical cancer? (Mark (X) one interval for routine screening.)
   | Annually | Every 2–3 years | Every 4–5 years | Greater than every 5 years | Will not be screening fully HPV vaccinated females | Unknown |

12. How often will this clinic routinely screen for cervical cancer among females that have been fully vaccinated with the HPV vaccine? (Mark (X) one.)
   | Annually | Every 2–3 years | Every 4–5 years | Greater than every 5 years | Will not be screening fully HPV vaccinated females | Unknown |

13. Will this clinic use any of the following methods to screen for cervical cancer?
   | Liquid-based cytology (Definition – Specimen suspended in liquid solution) | Other |

14. Please indicate to what extent you agree, disagree, or are unsure with each statement. Please respond to both a and b.
   | Agree | Disagree | Unsure |
---|---|---|---|
| a. There will be fewer numbers of abnormal Pap tests among vaccinated females. | | |
| b. There will be fewer referrals for colposcopy among vaccinated females. | | |

15. The Centers for Disease Control and Prevention (CDC) funds state health departments to provide breast and cervical cancer screening services to low income women through the National Breast and Cervical Cancer Early Detection Program (Title XV). The state health departments contract out the screening services to physicians and other health care providers. Is this clinic currently participating in this state or national screening program?
   | Yes | No | Unknown |

16. For purposes of this survey, which of the following categories describe your profession? – (Mark (X) only ONE.)
   | Physician | Physician assistant/ Nurse practitioner/ Nurse midwife | Registered nurse | Other clinic staff |

CLOSING STATEMENT
Thank you for completing this special survey. We appreciate your time and cooperation.
