BACKGROUND INFORMATION

A. Hospital number
B. Clinic type – Mark (X) only ONE.
   - OB/GYN
   - GM
C. AU number
D. Census contact name
E. Census contact Area code Telephone

INTRODUCTION

The Centers for Disease Control and Prevention is conducting a special survey on cervical cancer screening performed in hospital outpatient clinics. Please answer the following questions. We appreciate your time on this important public health concern.

FORM NHAMC (12-3-2008)
S-906
U.S. DEPARTMENT OF COMMERCE
Economics and Statistics Administration
U.S. CENSUS BUREAU
ACTING AS DATA COLLECTION AGENT FOR THE
U.S. Department of Health and Human Services
Centers for Disease Control and Prevention
National Center for Health Statistics

NOTICE – Public reporting burden of this collection of information is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office; 1600 Clifton Road, MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0234).

Assurance of Confidentiality – All information which would permit identification of an individual, a practice, or an establishment will be held confidential, will be used for statistical purposes only by NCHS staff, contractors, and agents only when required and with necessary controls, and will not be disclosed or released to other persons without the consent of the individual or establishment in accordance with section 308(d) of the Public Health Service Act (42 USC 242m) and the Confidential Information Protection and Statistical Efficiency Act (PL-107-347).

Does this clinic use any of the following methods to screen for cervical cancer? No
Mark (X) all that apply.

a. Conventional Pap test (Definition – Smear spread on glass slide and fixed)
   - Yes
   - No
   - Unknown

b. Liquid-based cytology (Definition – Specimen suspended in liquid solution)
   - Yes
   - No
   - Unknown

c. Other – Specify

Does this clinic perform colposcopy?
- Yes
- No
- Unknown

Your time and cooperation.
**INTRODUCTION**

The Centers for Disease Control and Prevention (CDC) funds state health departments to provide breast and cervical cancer screening services to low-income women through the National Breast and Cervical Cancer Early Detection Program (Title XV). The state health departments contract out the screening services to physicians and other health care providers. Is this clinic currently participating in this state or national screening program?

Mark (X) only ONE.

- Yes
- No
- Unknown

**CLOSING STATEMENT**

Thank you for completing this special survey. We appreciate your time and cooperation.
### Questions

#### 3a. Does this clinic ever order or collect the Human Papillomavirus (HPV) DNA test?
- Yes – Go to item 3b
- No
- Not aware of HPV DNA test

#### 4a. If a patient's Pap test result is borderline or abnormal, does this clinic routinely order an HPV DNA test to be performed on that sample (commonly called reflex HPV DNA testing)? (An HPV DNA test may be run on the same liquid-based medium as the Pap test or an HPV DNA test specimen may be collected at the same time as the conventional Pap test.)

| Yes – Go to item 4b | No
|---------------------|-----
| Yes
| No
| Unknown

#### 6. The health plans or health systems affiliated with this clinic do not offer the HPV DNA test.
- Yes – Skip to item 6b
- No
- Unknown

#### 11. Notifying or counseling patients about positive HPV DNA testing?
- Yes – Mark (X) all that apply.
- No
- Not aware there was a high risk or low risk HPV DNA test
- Unknown

#### 12. For which patients does this clinic usually order reflex HPV DNA testing (commonly called adjunct HPV testing or cotesting)?
- Mark (X) all that apply.
- Includes current, abnormal results
- Two consecutive normal Pap tests
- Women 21 years old to 29 years old
- Women 30 years old and over
- Women who request the test for cervical cancer

#### 8. How often does this clinic use an HPV test to detect:
- Rarely or never
- Sometimes
- Usually
- Always or almost always
- Do not recommend the HPV vaccine – SKIPPED

---

**Notes:**
- Mark (X) all that apply.
- Please skip to item 7 if Mark (X) all that apply.
- Always complete item 1.
- For questions 2, 3, 4, 5, 6, and 7, please refer to the NHAMCS-906 (12-3-2008) form for guidance.

---

**Questions 8-1:**

- Does this clinic routinely order or collect an HPV D cancer screening (commonly called adjunct HPV t)
  - Yes – Go to item 8b
  - No
  - Unknown
  - SKIPPED to item 7

- For which patients does this clinic routinely order adjunct HPV testing or cotesting?
  - Mark (X) all that apply:
  - Women under 21 years old
  - Women 21 years old to 29 years old
  - Women 30 years old and over
  - Women who request the test for cervical cancer
  - Women who request the test to check their HPV status
  - Other – Specify

**Page 2**
patient’s Pap test result is borderline or abnormal, this clinic routinely order an HPV DNA test to be performed on that sample (commonly called reflex DNA testing)? (An HPV DNA test may be run on the same liquid-based medium as the Pap test or an HPV DNA test specimen may be collected at the time as the conventional Pap test.)

Yes – Go to item 4b
No
Unknown  

which borderline or abnormal Pap test result would clinic order or collect a reflex HPV DNA test? X (all) that apply.
ASC-US (atypical squamous cells of undetermined significance)
ASC-H (atypical squamous cells of undetermined significance – cannot exclude high-grade intraepithelial lesion)
LSIL (low-grade squamous intraepithelial lesion, encompassing mild dysplasia/CIN1)
HSIL (high-grade squamous intraepithelial lesion, moderate dysplasia/CIN2, severe dysplasia/CIN3), and carcinoma in situ
AGC (atypical glandular cells)

which patients does this clinic usually order reflex DNA testing? – Mark (X) all that apply.
Women under 21 years old
Women 21 years old to 29 years old
Women 30 years old and over
Other – Specify

6a. Does this clinic routinely order or collect an HPV DNA test at the same time as the Pap test as part of routine cervical cancer screening (commonly called adjunct HPV testing or cotesting)?

| Yes – Go to item 6b |
| No |
| Unknown  SKIP to item 7 |

b. For which patients does this clinic routinely order or collect an HPV DNA test along with the Pap test (commonly called adjunct HPV testing or cotesting)? Mark (X) all that apply.
- Women under 21 years old
- Women 21 years old to 29 years old
- Women 30 years old and over
- Women who request the test for cervical cancer screening
- Women who request the test to check their HPV infection status
- Other – Specify

7. Given the following screening histories, when would this clinic recommend that a woman between 30 and 60 years of age return for her next Pap test?

| Prior Pap test results in past 5 years (excluding current normal results) | Current Pap test result | No follow-up needed | Less than 6 months | 6 months to less than 1 year | 1 year | 2 years | 3 years or more | Have no experience with this type of patient or test |
|---|---|---|---|---|---|---|---|---|---|
| (a) Two consecutive normal Pap tests | Has not had HPV DNA test | Normal | | | | | | | |
| (b) Two consecutive normal Pap tests | Negative | Normal | | | | | | | |
| (c) Two consecutive normal Pap tests | Positive | Normal | | | | | | | |
| (d) Has not had a Pap test | Normal | | | | | | | | |
| (e) Has not had a Pap test | Negative | | | | | | | | |
| (f) Abnormal Pap test | Normal | | | | | | | | |
| (g) Abnormal Pap test | Positive | | | | | | | | |

QUESTIONS 8-14 ASK ABOUT THE HPV VACCINE

8. How often does this clinic use an HPV test to determine who should get the HPV vaccine? Mark (X) only one.
- Rarely or never
- Sometimes
- Usually
- Always or almost always
- Do not recommend the HPV vaccine – SKiP to item 10.
