

Data Detectives

Summer Camp Newsletter

Thursday, August 16, 2018

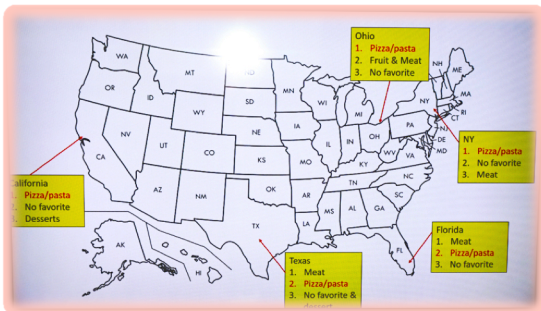

Data Detectives are on the case!

Today, campers used the statistical concepts and tools they learned throughout the week to take on the role of data detective.

In the morning session, campers were introduced to a crime scene and worked to solve the crime by finding average foot length and arm span to catch the perpetrator.

In the afternoon session, we first examined the state data we pulled from the web yesterday to develop a custom restaurant menu for each state. Then, we played Jeopardy and tested the knowledge the campers gained during the week.

What's Up Tomorrow?

Our last day will culminate in 2 team presentations, a pizza lunch, and an ice cream social.

We'll also be signing t-shirts so come in your camp t-shirts.

Reminders:

Campers are asked to wear camp t-shirts tomorrow.

Pizza lunch and ice cream from UMD's creamery will be provided. But please send lunch and dessert if your child cannot eat this.

Still send water bottles and snacks.

Also, please send in completed parent evaluations.

Remember, we are a nut and chocolate free zone!

Conducted by: The National Center for Health Statistics, Camp Director, Dr. Ryne Paulose
