

Data Brief 225. Viral Hepatitis Among Non-Hispanic Asian Adults in the United States, 2011–2014

Data table for Figure 1. Prevalence of antibody to hepatitis A virus among adults aged 18 and over, by race and Hispanic origin and by birth place for non-Hispanic Asian adults, 2011–2014

Characteristic	Percent	Lower 95% CI	Upper 95% CI
Total population	36.51	34.59	38.47
Race and Hispanic origin			
Non-Hispanic Asian	70.87	67.89	73.73
Non-Hispanic white ¹	25.40	23.66	27.20
Non-Hispanic black ^{1,2}	38.04	34.28	41.91
All Hispanic ^{2,3}	73.14	70.09	76.04
Non-Hispanic Asian birth place			
Born outside the United States ⁴	76.64	73.31	79.75
U.S.-born	41.31	33.69	49.24

¹Significantly different from non-Hispanic Asian adults ($p < 0.05$).

²Significantly different from non-Hispanic white adults ($p < 0.05$).

³Significantly different from non-Hispanic black adults ($p < 0.05$).

⁴Significantly different from U.S.-born adults ($p < 0.05$).

NOTES: CI is confidence interval. Antibody to hepatitis A virus may be due to natural infection or immunization.

SOURCE: CDC/NCHS, National Health and Nutrition Examination Survey, 2011–2014.

Data Brief 225. Viral Hepatitis Among Non-Hispanic Asian Adults in the United States, 2011–2014

Data table for Figure 2. Prevalence of hepatitis B virus infection (past or current) among adults aged 18 and over, by race and Hispanic origin and by birth place for non-Hispanic Asian adults, 2011–2014

Characteristic	Percent	Lower 95% CI	Upper 95% CI
Total population	4.65	4.03	5.34
Race and Hispanic origin			
Non-Hispanic Asian	22.58	19.90	25.45
Non-Hispanic white ¹	2.55	1.91	3.34
Non-Hispanic black ^{1,2}	10.18	8.79	11.70
All Hispanic ^{1,3}	3.64	2.70	4.80
Non-Hispanic Asian birth place			
Born outside the United States ⁴	26.46	23.27	29.85
U.S.-born*	2.72	1.12	5.46

* Estimate may be unreliable due to relative standard error greater than 30% and number of positives fewer than 10.

¹Significantly different from non-Hispanic Asian adults ($p < 0.05$).

²Significantly different from non-Hispanic white adults ($p < 0.05$).

³Significantly different from non-Hispanic black adults ($p < 0.05$).

⁴Significantly different from U.S.-born adults ($p < 0.05$).

NOTES: CI is confidence interval. Hepatitis B virus infection, past or current, is indicated by the presence of hepatitis B core antibody.

SOURCE: CDC/NCHS, National Health and Nutrition Examination Survey, 2011–2014.

Data Brief 225. Viral Hepatitis Among Non-Hispanic Asian Adults in the United States, 2011–2014

Data table for Figure 3. Prevalence of current hepatitis B virus infection among adults aged 18 and over, by race and Hispanic origin and by birth place for non-Hispanic Asian adults, 2011–2014

Characteristics	Percent	Lower 95% CI	Upper 95% CI
Total population	0.39	0.29	0.50
Race and Hispanic origin			
Non-Hispanic Asian	3.29	2.21	4.71
Non-Hispanic white ^{*.1}	0.15	0.05	0.33
Non-Hispanic black ^{1.2}	0.77	0.43	1.27
All Hispanic ^{*.1,3}	0.17	0.04	0.44
Non-Hispanic Asian birth place			
Born outside the United States ⁴	3.73	2.47	5.37
U.S.-born [*]	1.07	0.10	4.15

* Estimate may be unreliable due to relative standard error greater than 30% and number of positives fewer than 10.

¹Significantly different from non-Hispanic Asian adults ($p < 0.05$).

²Significantly different from non-Hispanic white adults ($p < 0.05$).

³Significantly different from non-Hispanic black adults ($p < 0.05$).

⁴Significantly different from U.S.-born adults ($p < 0.05$).

NOTES: CI is confidence interval. Current Hepatitis B virus infection is indicated by the presence of hepatitis B surface antigen.

SOURCE: CDC/NCHS, National Health and Nutrition Examination Survey, 2011–2014.

Data Brief 225. Viral Hepatitis Among Non-Hispanic Asian Adults in the United States, 2011–2014

Data table for Figure 4. Prevalence of current hepatitis C virus infection among adults aged 18 and over, by race and Hispanic origin, 2011–2014

Characteristics	Percent	Lower 95% CI	Upper 95% CI
Total population	0.89	0.64	1.21
Race and Hispanic origin			
Non-Hispanic Asian*	0.16	0.02	0.61
Non-Hispanic white ¹	0.76	0.46	1.18
Non-Hispanic black ^{1,2}	1.92	1.24	2.82
All Hispanic ^{1,3}	0.78	0.45	1.27

* Estimate may be unreliable due to relative standard error greater than 30% and number of positives fewer than 10.

¹Significantly different from non-Hispanic Asian adults ($p < 0.05$).

²Significantly different from non-Hispanic white adults ($p < 0.05$).

³Significantly different from non-Hispanic black adults ($p < 0.05$).

NOTES: CI is confidence interval. Current hepatitis C virus infection is indicated by the presence of hepatitis C virus RNA.

SOURCE: CDC/NCHS, National Health and Nutrition Examination Survey, 2011–2014.
