2014	100.9	141.9	118.0	123.7	137.6	130.4

Data table for Figure 1. Crude and age-adjusted rates for COPD-related deaths for adults aged 25 and over, by sex: United States, 2000-2014

NOTES: COPD is chronic obstructive pulmonary disease. COPD-related deaths were identified as those with COPD (ICD-10 code J40-J44) reported anywhere on the death certificat (i.e., as an underlying or a contributing cause of death). SOURCE: NCHS, National Vital Statistics System mortality data, 2000–2014.

Data table for Figure 2. COPD-related death rates for selected age groups, by sex:
United States, 2000 and 2014

Ago group and sox	2000	2014
Age group and sex	2000	2014
Men		
45–64	54.9	61.9
65–84	649.3	456.3
85 and over	2,008.4	1,556.5
Women		
45–64	37.3	46.4
65–84	403.3	338.2
85 and over	984.1	1,045.9

NOTES: COPD is chronic obstructive pulmonary disease. COPD-related deaths were identified as those with COPD (ICD–10 code J40–J44) reported anywhere on the death certificate (i.e., as an underlying or a contributing cause of death) SOURCE: NCHS, National Vital Statistics System mortality data, 2000 and 2014.

Data table for Figure 4. Age-adjusted rate for COPD-related deaths for black adults aged 25 and over, by sex: United States, 2000–2014

NOTES: COPD is chronic obstructive pulmonary disease. COPD-related deaths were identified as those with COPD (ICD–10 code J40–J44) reported anywhere on the death certificate (i.e., as an underlying or a contributing cause of death). Black persons may be of Hispanic or non-Hispanic origin. SOURCE: NCHS, National Vital Statistics System mortality data, 2000–2014.

Data table for Figure 5. Top five underlying causes of death for COPD-related deaths for adults aged 25 and over, by sex: United States, 2014

Cause of death and sex	Percent
Women	
COPD	54.6
Heart disease	15.5
Cancer	12.1
Unintentional injuries	1.7
Stroke	1.6
Men	
COPD	47.7
Heart disease	19.4
Cancer	15.3
Diabetes	1.7
Unintentional injuries	1.7
