A revised mortality data file for 2014 was released on April 3, 2017 to include corrections from Tennessee and Massachusetts affecting 125 records previously coded to Accidental discharge of firearms (W32-W34). After the revision, 50% of the changed records are now classified as Assault (homicide) by discharge of firearms (*U01.4 and X93-X95); 42% as Intentional self-harm (suicide) by discharge of firearms (X72-X74); 4% as Discharge of firearms, undetermined intent (Y22-Y24); and the remaining 4% to various other causes. For more information, please see "Deaths: Final Data for 2014." This table was updated on May 3, 2017 to correct errors. The shaded areas in this table indicate the changes that were made.

[Rates per 100,000 population in specified group. Rates for "all ages" include deaths for age "Under 1 year." Figures for "age not stated" are included in "all ages" but are not distributed among age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys]

¹ Rank based on number of deaths

[Rates per 100,000 population in specified group. Rates for "all ages" include deaths for age "Under 1 year." Figures for "age not stated" are included in "all ages" but are not distributed among age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys]

	Cause of death (based on the International Classification of Diseases,		Percent of total	
Rank ¹	Tenth Revision), race, sex, and age	Number	deaths	Rate
	White, male, 65 years and over

¹ Rank based on number of deaths

[Rates per 100,000 population in specified group. Rates for "all ages" include deaths for age "Under 1 year." Figures for "age not stated" are included in "all ages" but are not distributed among age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys]

¹ Rank based on number of deaths

[Rates per 100,000 population in specified group. Rates for "all ages" include deaths for age "Under 1 year." Figures for "age not stated" are included in "all ages" but are not distributed among age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys]

¹ Rank based on number of deaths

[Rates per 100,000 population in specified group. Rates for "all ages" include deaths for age "Under 1 year." Figures for "age not stated" are included in "all ages" but are not distributed among age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys]

			Percent	
Rank ¹	Cause of death (based on the International Classification of Diseases, Tenth Revision), race, sex, and age	Number	of total deaths	Rate
	ronan Novision), 1000, 00X, and ugo	Humbor	doutio	nato

¹ Rank based on number of deaths

_

LCWK3. Deaths, percent of total deaths, and death rates for the 15 leading causes of death in selected age groups, by race and sex: United States, 2014

[Rates per 100,000 population in specified group. Rates for "all ages" include deaths for age "Under 1 year." Figures for "age not stated" are included in "all ages" but are not distributed among age groups. Data for races other than white and black should be interpreted with caution because of inconsistencies between the reporting of race on death certificates and on censuses and surveys]

			Percent
