

A revised mortality data file for 2014 was released on April 3, 2017 to include corrections from Tennessee and Massachusetts affecting 125 records previously coded to Accidental discharge of firearms (W32-W34). After the revision, 50% of the changed records are now classified as Assault (homicide) by discharge of firearms (*U01.4 and X93-X95); 42% as Intentional self-harm (suicide) by discharge of firearms (X72-X74); 4% as Discharge of firearms, undetermined intent (Y22-Y24); and the remaining 4% to various other causes. Data by state of residence are impacted in Connecticut, Florida, Georgia, Kentucky, North Carolina, and Virginia for records where the death occurred in Tennessee or Massachusetts but the decedent was a resident of another state. For more information, please see "[Deaths: Final Data for 2014](#)." This table was updated on May 3, 2017 to correct errors. The shaded areas in this table indicate the changes that were made.
