ICD-10 Mortality Perinatal Subset (2013)

Subset of alphabetical index to diseases and nature of injury for use with perinatal conditions (P00-P96)

| Conditions arising in the perinatal period
| Note: Conditions arising in the perinatal period, even though death or morbidity occurs later, should, as far as possible, be coded to chapter XVI, which takes precedence over chapters containing codes for diseases by their anatomical site.
| These exclude:
| Congenital malformations, deformations and chromosomal abnormalities (Q00-Q99)
| Endocrine, nutritional and metabolic diseases (E00-E99)
| Injury, poisoning and certain other consequences of external causes (S00-T99)
| Neoplasms (C00-D48)
| Tetanus neonatorum (A33 2a)
