¹Employment status is assessed at the time of interview and is obtained for persons aged 18 years and over. In these tables it is presented only for persons aged 18–64 years. In 2001, the question used for coding employment status increased from four possible responses to five possible

²The 2008 health insurance estimates are being released prior to final data editing and final weighting, to provide access to the most recent information from NHIS. The resulting estimates for persons without health insurance are generally 0.1-0.3 percentage points lower than those based on the editing procedures used for the final data files. Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ by more than 0.3 percentage points from estimates based on final files.

Note: A person was defined as insured if he or she had any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

Data source: CDC/NCHS, National Health Interview Survey, 1997–2008. Estimates for 2008 are based on data collected from January - June 2008. Estimates are based on household interviews of a sample of the civilian noninstitutionalized population.
