1/Rankings are from lowest to highest infant mortality rates (IMR). Countries with the same IMR receive the same rank.

The country with the next highest IMR is assigned the rank it would have received had

the lower-ranked countries not been tied, i.e., skip a rank.

2/Refers to countries, territories, cities, or geographic areas with at least 2.5 million population and with complete counts of live births and infant deaths according to the United Nations Demographic Yearbook.

3/Under 1 year of age.

NOTES: Some rates for selected countries and selected years were revised and differ from previous editions of *Health, United States*.

Data for additional years are available. See Appendix III.
