See footnotes at end of table.

**Table 120 (page 2 of 2). Number of magnetic resonance imaging (MRI) units and computed tomography (CT) scanners: Selected countries, selected years 1990–2007**

[Data are based on reporting by the Organisation for Economic Co-operation and Development (OECD) countries]

-- Data not available.

<sup>1</sup>Starting with 2000 data, the number of MRI units include only those that are approved for billing to Medicare (Australia's national health program). In 1999, approved units represented approximately 60% of total units.

<sup>2</sup>The number of units in freestanding imaging facilities was imputed for years prior to 2003 based on data collected in the 2003 National Survey of Selected Medical Imaging Equipment, conducted by the Canadian Institute for Health Information. MRI units in Quebec are not included in 2000.

<sup>3</sup>Prior to 2000, the data include only equipment of Health Sector establishments.

<sup>4</sup>Data include equipment installed in all types of hospitals.

<sup>5</sup>Equipment used in military hospitals and the health institutes of Hungarian State Railways are not included.

<sup>6</sup>1990 data include only equipment in public and private hospitals.

<sup>7</sup>Prior to 2000, the data include only equipment in hospitals.

<sup>8</sup>2005 data are the number of hospitals reporting to have an MRI unit.

<sup>9</sup>Data do not include equipment in all the private sectors.

<sup>10</sup>Data include devices in hospitals and do not include equipment in other health care facilities.

<sup>11</sup>Data include equipment available in hospitals and do not include equipment in other health care facilities.

<sup>12</sup>Data include devices in public sector establishments only.

<sup>13</sup>Data are from the MRI Census and are comparable to the OECD definition. The devices in U.S. territories are not included.

NOTES: Data for additional years are available. Countries use different methods for collecting data. Therefore, estimates may not be directly comparable across countries and comparisons among them should be made with caution. See Appendix III.
