<sup>1</sup>Data for 2004 (available in spreadsheet version) and 2005 were revised in March 2007. Available from: <http://www.census.gov/hhes/www/hlthins/data/usernote/index.html>.

NOTES: Questions on health insurance coverage are asked of the previous calendar year. Persons were considered uninsured if they were not covered by any type of health insurance at any time in that year. Ninety-percent confidence intervals for selected years are available in the spreadsheet version of this table. Available from: <http://www.cdc.gov/nchs/hus.htm>. Starting with 1997 data, people with no coverage other than access to the Indian Health Service are no longer considered covered by health insurance. The effect of this change on the estimate of number uninsured is negligible. Starting with 1999 data, estimates reflect the results of follow-up verification questions which decreased the percent uninsured by 1.2 percentage points. See Appendix I, Current Population Survey (CPS). Data for additional years are available. See Appendix III.
