-- Data not available.

* Estimates are unreliable or data do not meet publication criteria.

¹Industry data from 2003 to 2008 are based on the North American Industry Classification System (NAICS), 2002. Industry data from 2009 to the present are based on NAICS 2007. NAICS replaces the Standard Industrial Classification (SIC) system. Because of substantial differences between these systems, industry data classified by these two systems are not comparable. Industry data for 1995–2002 classified by SIC are presented in *Health, United States, 2004*, Table 49, available from: <http://www.cdc.gov/nchs/hus.htm>. See Appendix II, Industry of employment.

²Includes fatal injuries at all establishments categorized as Mining (Sector 21) in the NAICS, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

³Starting with 2011 data, CFOI combined the categories “Management of companies and enterprises” and “Administrative and support and waste management and remediation services” into one category entitled “Management, administrative, and waste services.”

⁴Includes fatal work injuries to workers employed by governmental organizations, regardless of industry.

NOTES: Fatal work injuries are based on revised data and may differ from originally published data from CFOI. See Appendix I, Census of Fatal Occupational Injuries (CFOI). Private sector totals include injuries with unknown industry. Data for additional years are available. See the Excel spreadsheet on the *Health, United States* website at: <http://www.cdc.gov/nchs/hus.htm>.
