- Quantity zero.

¹Estimated percent of staffed beds that are occupied. Occupancy rate is calculated as the average daily census (inpatient days divided by 365) divided by the number of hospital beds. See Appendix II, Occupancy rate.

²See Appendix II, Average annual rate of change (percent change).

NOTES: Community hospitals are nonfederal short-term general and special hospitals whose facilities and services are available to the public. The types of facilities included in the community hospitals category have changed over time. See Appendix II, Hospital. See *Health, United States, 2013*, Table 109, for 1970 hospital data.
