Nonveterans	5.7	5.4	5.7	5.7	5.1	5.1	5.1	4.9	5.3

¹Health care expenditures exclude construction, medical administration, and miscellaneous operating expenses at Department of Veterans Affairs (VA) headquarters.

²Includes expenditures for miscellaneous benefits and services, contract hospitals, education and training, subsidies to state veterans hospitals, nursing homes and residential rehabilitation treatment programs (formerly domiciliaries), and the Civilian Health and Medical Program of the Department of Veterans Affairs.

³Discharges from medicine, surgery, psychiatry, rehabilitation medicine, spinal cord, and neurology units, and residential rehabilitation treatment programs (formerly, domiciliary care). Does not include long-term stays.

⁴Hospital outpatient care. Includes the following services: physicians, laboratory tests, home-based primary care, or outpatient fee-basis care.

⁵Includes VA-covered state nursing home veteran patients.

⁶Individuals receiving services. Individuals with multiple discharges or visits are only counted once in the inpatient or outpatient category. The inpatient and outpatient totals are not additive because most inpatients are also treated as outpatients.

⁷Includes veterans who receive medical care subject to copayments according to income level, based on financial means testing.

⁸Includes expenditures for services for veterans who were prisoners of war, exposed to Agent Orange, and other. Veterans reporting Agent Orange exposure but not treated for it were means tested and placed in the low income or other group depending on income.

NOTES: Some veterans have multiple sources of health coverage, including Medicare or private insurance. Estimates in this table relate only to health care use paid for by the Veteran's Administration. At the end of FY2014, the veteran population was estimated at 22.0 million, with 45% aged 65 and over. Of all living veterans, 5% had served during World War II, 9% during the Korean conflict, 33% during the Vietnam era, 32% during the Persian Gulf War (service from August 2, 1990 to present), and 25% during peacetime. Percentages sum to more than 100% because some veterans serve during more than one war. See Appendix I, Department of Veterans Affairs National Enrollment and Patient Databases. Data for additional years are available. See the Excel spreadsheet on the *Health, United States* website at: <http://www.cdc.gov/nchs/hus.htm>.

SOURCE: Department of Veterans Affairs (VA), Office of the Assistant Deputy Under Secretary for Health, National Patient Care Database, National Enrollment Database, budgetary data, and unpublished data. Veteran population estimates were provided by the VA's Office of the Actuary. See Appendix I, Department of Veterans Affairs National Enrollment and Patient Databases.
