

Data table for Figure 11. Distribution of emergency department visits within the past 12 months for adults aged 18–64, by type of coverage: United States, 2014

Excel and PowerPoint: <http://www.cdc.gov/nchs/hus/contents2015.htm#fig11>

<i>Insurance coverage</i>	<i>Percent</i>	<i>SE</i>
Private	53.6	1.0
Medicaid	23.4	0.8
Uninsured	15.1	0.7
Other	7.9	0.5

SE is standard error.

NOTES: Insurance categories are based on coverage at the time of interview and are mutually exclusive. Persons who reported both Medicaid and private coverage are classified as having private coverage. Medicaid coverage includes persons covered by state-sponsored health plans or the Children’s Health Insurance Program (CHIP). The other insured category includes military, other government, and Medicare coverage. Persons not covered by private insurance, Medicaid, or other plans are classified as uninsured. Persons with only Indian Health Service coverage are considered uninsured. The count of emergency department visits in 2014 was determined by using the midpoint of the response categories and then summing the count. Response category None was recoded to 0 visits. Response category 1 was recoded to 1 visit. Response category 2–3 was recoded to 2.5 visits. Response category 4–5 was recoded to 4.5 visits. Response category 6–7 was recoded to 6.5 visits. Response category 8–9 was recoded to 8.5 visits. Response category 10–12 was recoded to 11 visits. Response category 13–15 was recoded to 14 visits. Response category 16 or more was recoded to 16 visits. See Appendix II, Emergency department or emergency room visit; Health insurance coverage.
