¹Persons of Hispanic origin may be of any race. Starting with 1999 data, race-specific estimates are tabulated according to the 1997 *Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity*. The three non-Hispanic race categories shown in the table conform to the 1997 Standards. Race-specific estimates are for persons who reported only one racial group. See Appendix II, Hispanic origin; Race.

²Includes all persons not shown separately.

³Obesity is defined as a body mass index at or above the sex- and age-specific 95th percentile of the CDC growth charts. Pregnant women are excluded.
