¹Persons of Hispanic origin may be of any race. Race-specific estimates are tabulated according to the 1997 *Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity*. The single-race categories plus multiple-race category shown in the table conform to the 1997 Standards. Starting with 2003 data, race responses of other race and unspecified multiple race were treated as missing, and then race was imputed if these were the only race responses. Almost all persons with a race response of other race were of Hispanic origin. See Appendix II, Hispanic origin; Race.

²Includes all persons not shown separately.

³Based on persons responding to the question, “During the past 12 months was there any time when [person] needed dental care (including checkups) but didn’t get it because [person] couldn’t afford it?”

⁴Three-year average annual estimates are shown in order to present estimates for the American Indian or Alaska Native and the multiple-race populations. Annual estimates are not stable for smaller population groups.
