Table BedComSt. Community hospital beds and average annual percent change, by state: United States, selected years 1980–2019—Con.

[Data are based on reporting by a census of hospitals]

– Quantity zero.

¹See Sources and Definitions, Bed, health facility.

²See Sources and Definitions, Average annual rate of change (percent change).

NOTES: Community hospitals are nonfederal, short-term general and special hospitals whose facilities and services are available to the public. The types of facilities included in this category have changed over time. Starting with 2017 data, the American Hospital Association (AHA) changed its methodology to include all general and special hospitals licensed by the appropriate state agency and accredited by one of the following: The Joint Commission, DNV GL Healthcare, Center for Improvement in Healthcare Quality, or Medicare. Data for 2016 and earlier include only hospitals registered by AHA. Because of the change in methodology, data may not be comparable across the two time periods. However, an assessment of 2015 data using both methodologies showed comparable estimates. See Sources and Definitions, Hospital.
