Terr more information, see the National Income and Product Accounts Handbook, Chapter 2. Available from: https://www.bea.gov/resources/methodologies/nipa-handbook/pdf/chapter-02.pdf. Data were accessed on November 2, 2021.

²Consists of research and total structures and equipment.

³For more information on the detailed price series recommended for deflating each category of spending, see "National Health Expenditure Accounts: Methodology Paper, 2019." Available from: https://www.cms. gov/files/document/definitions-sources-and-methods.pdf. ⁴To account for inflation and compare expenditures over time, current (or nominal) dollar values are adjusted to constant (or real) dollars using the chain-weighted National Health Expenditure deflator. See

"To account for inflation and compare expenditures over time, current (or nominal) dollar values are adjusted to constant (or real) dollars using the chain-weighted National Health Expenditure deflator. See Sources and Definitions, Inflation-adjusted expenditures.

⁵See Sources and Definitions, Average annual rate of change (percent change).

NOTES: Dollar amounts shown are in current dollars, unless otherwise noted. See Sources and Definitions, Gross domestic product (GDP); Health expenditures, national. Percentages are calculated using unrounded data. Estimates may not add to totals because of rounding. Census resident population is used to calculate per capita amount. For more information on national health expenditure categories, sources, and methods, see "National Health Expenditure Accounts: Methodology Paper, 2019". Available from: https://www.cms.gov/files/document/definitions-sources-and-methods.pdf. See Sources and Definitions, National Health Expenditure Accounts (INHEA). Data have been revised and differ from previous editions of *Health*, *United States*.
