Introduction

Interviewing for the 2006-2008 National Survey of Family Growth (NSFG) was conducted from June 2006 through December 2008 by the University of Michigan's Institute for Social Research (ISR), under contract to the National Center for Health Statistics (NCHS). In-person interviews were conducted with 7,356 women and 6,139 men 15-44 years of age, of all marital statuses. Most of the survey was administered using computer-assisted personal interviewing (CAPI), in which a trained female interviewer asks the questions and enters the answers into a computer. Public use data files for 2006-2008 NSFG were released in May 2010.

The data files documented here are based on questions asked in the Audio Computer-Assisted Self-Interview (ACASI) portion of the NSFG interviews in 2006-2008. In ACASI, the respondent used the interviewer's computer to answer the most sensitive items directly – by entering his or her own answers into the computer. The respondent could read the questions on the screen, as well as listen to them through headphones. The purpose of ACASI was to give respondents a more private opportunity to report this sensitive information.

Respondents who participated in the survey were assured that the information they provided would be used only to produce statistics and that their individual answers would be kept confidential. These ACASI Files have been designed to assure that this promise is kept. Because of the sensitivity of the ACASI information, the potential consequences of a misuse of the data, or of a breach of confidentiality, could be more serious than with other data from the NSFG survey. Accordingly, NCHS has deemed it necessary and prudent to distribute most of

the ACASI items in separate ACASI files, with a User Agreement signed by all researchers who will work with these data. In this manner, NCHS takes one additional step to assure that the data are being used for legitimate statistical, social science, and public health research purposes.

ACASI Data Files and Documentation

The ACASI **data files** are provided on CD-ROM to users who have completed the access procedures described on the NSFG webpage (www.cdc.gov/nchs/nsfg.htm). The access procedures involve 2 steps:

- a) Submitting a description (on letterhead of the user's organization) of the proposed analyses with ACASI data, and
- b) Signing a User Agreement specifying the conditions for use of the ACASI data. The User Agreement (in pdf format) is accessible on the NSFG website or can be emailed upon request.

The **data files** are provided in ASCII format on the ACASI CD-ROM. There is one file for the male ACASI data and another file for the female ACASI data. **Program syntax for SAS, SPSS, and STATA** statistical software packages are also provided on the CD-ROM. All 3 sets of syntax files include statements for reading in the variables from the ACASI data files and assigning variable labels. The SAS program statements also include syntax for assigning value labels for all variables, in correspondence with their appearance in the codebook documentation. The SPSS and STATA syntax includes value label assignments as well, but for selected variables where values have been collapsed for codebook display, the SPSS and STATA value labels will not correspond with the codebook documentation.

The **documentation** for the ACASI files consists of this **User's Guide**, followed by **file indexes** for the male and female files and complete **codebooks** for the male and female files. For convenience, all of this documentation is provided in a single PDF file on the ACASI CD-ROM, but is also posted on the NSFG webpage (www.cdc.gov/nchs/nsfg.htm).

If you have questions about any of these ACASI related materials, please contact NSFG staff at nsfg@cdc.gov or 301-458-4222.

ACASI File Content

The ACASI files include most of the questions in the ACASI portion of the 2006-2008 NSFG interview (female Section J and male Section K). Two series – one on height and weight and one on income and sources of income – were collected in ACASI, but they were included on the 2006-2008 Public Use Files released in May 2010.

The questions included in ACASI were largely the same for male and female respondents.

- Comparable items were asked about drug use, risk behaviors for sexually transmitted diseases (STDs, including HIV), and experience with STDs.

- Both male and female respondents were given an opportunity to re-report their experience with pregnancies or fathering pregnancies that were previously reported directly to the interviewer.
- All adult respondents (18-44) were asked about non-voluntary sexual intercourse and types of force they may have experienced, if they reported non-voluntary intercourse.
- While the main interviewer-administered portion of the NSFG interview was limited to heterosexual vaginal intercourse, in ACASI all respondents were asked about other types of sexual activity, including oral and anal sex and same-sex partners.

The 2006-2008 ACASI data files are intended to be used in conjunction with the 2006-2008 NSFG public use data files previously released. In particular, to obtain weighted national estimates or accurate variance estimates, the user must merge in weighting and sample design variables from the public use files. The user is referred to the User's Guide for the 2006-2008 NSFG Public Use Files for descriptions of the data preparation procedures, sample design, and coding conventions that apply to both the public use files and to the ACASI files.

ACASI File Characteristics and Data Layout

There are 2 ASCII data files containing the ACASI items for the 2006-2008 National Survey of Family Growth. One file contains data for each of the 7,356 women interviewed, and the other contains data for each of the 6,139 men interviewed. Each of these data files include CASEID, the case number that enables users to merge ACASI File data with data from the NSFG Cycle 6 Public Use Files.

Female ACASI File:

file name:	2006-2008NSFGFemaleACASI.dat
number of records:	7,356 (female respondents interviewed in 2006-2008 NSFG)
record length:	140
number of variables:	98
file size:	1021 kilobytes

Male ACASI File:

file name:	2006-2008NSFGMaleACASI.dat
number of records:	6,139 (male respondents interviewed in 2006-2008 NSFG)
record length:	151
number of variables:	109
file size:	918 kilobytes

Data Layout for Female ACASI File:

<u>Column Locations</u>	<u>Variable(s)</u>
1-5	CASEID
6	QuestYear (Year 1, 2 or 3 of the continuous NSFG)
7-13	Pregnancy reporting – number ending in live birth, abortion, or other outcomes
14-16	Suspension/expulsion from school
17-27	Substance use: cigarettes, alcohol, marijuana, cocaine, crack, IV drugs
28-44	Sex with males: Specific sexual behaviors that R may have engaged in Condom use at last occurrence of vaginal, oral, or anal sex Condom use at last occurrence of any type of sex & reasons why
45-65	Nonvoluntary sexual intercourse with males (<i>asked only for 18-44</i>)
66-112	STD/HIV risk behaviors with male partners, including numbers of male partners
113-130	Sex with females, including numbers of female partners
131-140	Sexual attraction, sexual orientation, and STD experience

Data Layout for Male ACASI File:

<u>Column Locations</u>	<u>Variable(s)</u>
1-5	CASEID
6	QuestYear (Year 1, 2 or 3 of the continuous NSFG)
7-12	Significant life events, including school suspension/expulsion
13-19	Substance use: alcohol, marijuana, cocaine, crack, IV drugs
20-30	Pregnancy/abortion: Ever caused pregnancies/births/abortions; if so, how many <i>If R < 25: Ever told so; if so, what happened the last time</i>
31-46	Sex with females: Specific sexual behaviors that R may have engaged in Condom use at last occurrence of vaginal, oral, or anal sex Condom use at last occurrence of any type of sex & reasons why
47-59	Nonvoluntary sexual intercourse with females (<i>asked only for 18-44</i>)
60-105	STD/HIV risk behaviors with female partners, including numbers of female partners
106-110	Sex with males: Specific sexual behaviors that R may have engaged in Condom use at last occurrence of oral or anal sex Condom use at last occurrence of any type of sex
111-120	Nonvoluntary sex with males (<i>asked only for 18-44</i>)
121-139	HIV/STD risk behaviors with male partners, including numbers of male partners
140-142	Condom use at last sex of any type

User Notes for Selected ACASI File Variables

CASEID -- The SAS, STATA, and SPSS program statements provided on the ACASI File CD-ROM read in CASEID as a character variable, to enable merging with public use file data. Merging with the main public use files is necessary to obtain the weighting and variance estimation variables.

Age when first began smoking cigarettes (AGESMK) – Female respondents who reported smoking at least 100 cigarettes in their lives were asked the age when they first began smoking cigarettes. The code 0 was used to indicate that she never smoked regularly. The responses to this question included some very low, implausible values, and these cases represented less than 1% of respondents. As done for the 2002 NSFG, all values 1-11 on the variable AGESMK in the female ACASI file were collapsed and "bottom-coded" at 11, to indicate "11 years or younger."

Ever injected illicit drugs (EVRINJECT) and Ever shared needles for intravenous drug use (EVRSHARE) -- All respondents were asked whether they have ever, in their lives, injected illicit drugs without a prescription or ever used a needle that they knew or suspected someone else had used before them. EVRINJECT is question KC-7 in the male ACASI and JC-10 in the female ACASI. EVRSHARE, question KC-8 in the male ACASI and question JC-11 in the female ACASI, was intended to measure needle-sharing in connection with non-prescription drugs. As in the 2002 NSFG, among both male and female respondents, there were a surprisingly large number of "yes" responses to these 2 questions, which suggested that many respondents misunderstood what was being asked. Despite the addition of clarifying text in the 2006-2008 NSFG to emphasize the "ever in your lifetime" timeframe, respondents were still confused by the EVRINJECT and EVRSHARE questions and over-reported these behaviors. As a result, neither EVRINJECT nor EVRSHARE are included in these ACASI data files, and the wording and placement of these questions will be reevaluated for use in future NSFG cycles.

Oral sex question wording changes – The questions on oral sex were modified between Cycle 6 (2002) and the first year of continuous interviewing in June 2006.

In Cycle 6, female respondents were asked these two questions on oral sex with males:

- *Has a male ever put his mouth on your vagina (also known as cunnilingus or oral sex)?*
- *Have you ever put your mouth on a male's penis (also known as fellatio or oral sex)?*

Starting in June 2006 (Year 1 of the 2006-2008 NSFG), female respondents were asked:

- *The next few questions are about oral sex. By oral sex, we mean stimulating the genitals with the mouth. Has a male ever performed oral sex on you?*
- *Have you ever performed oral sex on a male? That is, have you ever stimulated his penis with your mouth?*

In Cycle 6, male respondents were asked these two questions on oral sex with females:

- *Has a female ever put her mouth on your penis (also known as oral sex or fellatio)?*
- *Have you ever put your mouth on a female's vagina (also known as oral sex or cunnilingus)?*

Starting in June 2006 (Year 1 of the 2006-2008 NSFG), male respondents were asked:

- *Has a female ever performed oral sex on you, that is, stimulated your penis with her mouth?*
- *Have you ever performed oral sex on a female?*

Number of partners in lifetime and in last 12 months -- In the interviewer-administered portion of the NSFG Cycle 6 interview, respondents were asked only about heterosexual vaginal intercourse. In ACASI, respondents were asked about other forms of sexual contact, including vaginal, oral, and anal sex with opposite-sex partners, as well as sexual activity with same-sex partners. Considering all types of sexual contact they may have had, respondents were asked to report the number of opposite-sex partners and same-sex partners they have had in their lives and in the last 12 months. There were two approaches taken to address extreme values on these "numbers of partners" variables, and these are described below.

a) Respondents who gave responses on the "number of opposite-sex partners" questions that were potentially keying errors (for example, 222, 777, etc.) were asked a confirmation question shown below in the variable names ending in "V." If they answered "no" to this question, they were re-asked their number of partners. For example, if R answered 222 on PARTSLIF_1, he or she was asked PARTSLFV, and the new response was stored in PARTSLIF_2. Very few respondents needed to be re-asked their number of partners, but all of the raw variables involved in these series are included in the ACASI data files.

Female File:

- Number of male partners in lifetime -- PARTSLIF_1, PARTSLFV, PARTSLIF_2
- Number of male partners in last 12 months -- PARTS12M_1, PARTS12V, PARTS12M_2

Male File:

- Number of female partners in lifetime -- PARTSLIF_1, PARTSLFV, PARTSLIF_2
- Number of female partners in last 12 months -- PARTS12_1, PARTS12V, PARTS12_2
- Number of male partners in lifetime -- MALEPRTS_1, MALEPRTSV, MALEPRTS_2
- Number of male partners in last 12 months -- MALPRT12_1, MALPRT12V, MALPRT12_2

b) Some extreme values on the "numbers of partners" variables were not suspected to be keying errors during the ACASI interview, and they have been "top-coded" at values roughly representing the top 5% of cases. That is, all values greater than or equal to this top-coding value have been edited to this value. The original, full-detail variables are accessible only through the NCHS Research Data Center. The variables listed below have been top-coded for the 2006-2008

ACASI files as follows:

- PARTSLIF_1 & PARTSLIF_2 (“number of opposite-sex partners in lifetime” for both male & female respondents) have been top-coded at 50, representing “50 or more opposite-sex partners in lifetime.”
- Female PARTS12M_1 & PARTS12M_2 and Male PARTS12_1 & PARTS12_2 have been top-coded at 20, representing “20 or more opposite-sex partners in last 12 months.”
- MALEPRTS_1 & MALEPRTS_2 for male respondents have been top-coded at 10, representing “10 or more same-sex partners in lifetime.”
- MALPRT12_1 & MALPRT12_2 for male respondents have been top-coded at 6, representing “6 or more same-sex partners in last 12 months.”

Key to File Indexes

(For further details on any components of the file indexes, see this section in the 2006-2008 Public Use Files User's Guide)

Variable name:

Corresponds exactly or approximately to the question name in the CAPI Reference Questionnaire (CRQ), which is the text version of the programmed interview. The CRQs for the 2006-2008 NSFG are provided on the NSFG webpage (www.cdc.gov/nchs/nsfg.htm).

Starting and ending column locations for each variable

Item description and variable type:

For original data items asked during the interview, the CRQ question number appears in the item description. Item descriptions without question numbers in the ACASI files are mostly “computed variables,” created during the interview for the purposes of the computer-assisted survey program. In selected item descriptions, the abbreviation “R” is used to indicate “Respondent.”

Key to Codebook Documentation

(For further details on any components of the codebook documentation, see this section in the 2006-2008 Public Use Files User's Guide)

For each item, the codebook documentation includes a variable name, numbers indicating the beginning and ending column locations on the data file, the question text for the item, the "universe statement" (who was asked the question), numerical values into which responses were coded with detailed value labels, and unweighted frequencies.

Variable name:

The variable name corresponds to the question name that appears in the CAPI Reference Questionnaire (CRQ), which is the text version of the programmed interview. The CRQs for the 2006-2008 NSFG are provided on the NSFG webpage (www.cdc.gov/nchs/nsfg.htm).

Question text:

The question wording is given here, and where appropriate, ACASI wording variants are shown in parentheses.

Universe statement:

Some questions were asked of all respondents, and these are indicated as such. But for many variables in the codebook, beneath the question text is a statement specifying the respondents who were asked the question. The "universe statement" or "applicable specification" gives a basic description of the conditions under which respondents were asked the question -- that is, cases for whom the question was applicable.

Response categories:

For categorical variables and several continuous variables, the documentation lists all possible values with descriptive value labels. Variables that are not applicable for all respondents include the number of "inapplicable" cases. In the interest of space in the codebook, most continuous variables have been grouped into meaningful, yet manageable, sets of values. For some continuous variables, extreme (very high or very low) values have been recoded. Every question in the NSFG interview had a "don't know" and "refuse" option. These are only presented among the response categories if one or more cases gave such a response to the question. In addition, some variables have one or more cases with "not ascertained" values, and this category is shown where it applies.

Unweighted frequencies:

Frequencies are shown for the total sample of female and male respondents. These frequencies, or "marginal distributions," are raw unweighted counts of sample females and males; they are not estimates of numbers or distributions for the population represented by the sample. **To make national estimates, sample cases must be weighted**, using weight variables merged in from the 2006-2008 NSFG Public Use Files. The unweighted frequencies are provided only as a guide to the researcher, who often wants to know in advance if the number of cases in a particular category is large enough to support a particular analysis.
