Contact Information							
<p>The National Center for Health Statistics (NCHS) links person-level survey data with health records from other data sources, such as Medicare or medicaid data. Linking allows NCHS to better understand the services residents of residential care communities use. In order to link data in future surveys, we would need the information below about your current residents. We would use this information for research purposes only. Federal laws authorize NCHS to ask for this information and require us to keep it strictly private.</p> <p>To help NCHS plan for future surveys, please answer the following questions: For each item below, in Column 1, indicate whether or not this residential care community has this information about its current residents. For each "yes" in Column 1, in Column 2, indicate whether or not this residential care community is willing to provide this information about residents.</p>
