35–39	103,476	52.8	99,859	51.6
40–44	24,678	13.4	23,671	13.2
45–54 ³	1,358	0.8	1,275	0.8

¹Includes births to race and origin groups not shown separately, such as white Hispanic and black Hispanic women, and births with origin not stated.

²Includes births to women of all ages. The rate shown for all ages is the fertility rate, which is defined as the total number of births (regardless of the age of the mother) per 1,000 women aged 15–44.

³The birth rate for women in this age group is computed by relating the number of births to women aged 45 and over to women aged 45–49, because most of the births in this group are to women aged 45–49.

⁴Race and Hispanic origin are reported separately on birth certificates. Persons of Hispanic origin may be of any race. Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. Forty-four states and the District of Columbia reported multiple-race data in 2013. The multiple-race data for these states were bridged to the single-race categories of the 1977 OMB standards for comparability with other states. Multiple-race reporting areas vary for 2012–2013; see Technical Notes of “Births: Preliminary Data for 2013.”

⁵Includes persons of Hispanic, non-Hispanic, and origin not stated, according to the mother’s reported race; see Technical Notes of “Births: Preliminary Data for 2013.”

⁶Includes all persons of Hispanic origin of any race; see Technical Notes of “Births: Preliminary Data for 2013.”

NOTE: For information on the relative standard errors of the data and further discussion, see Technical Notes of “Births: Preliminary Data for 2005.”

See footnotes at end of table.

Table 5. Births, by race and Hispanic origin of mother: United States and each state and territory, preliminary 2013—Con.

[By place of residence. Data are based on a continuous file of records received from the states. Figures are based on weighted data rounded to the nearest individual, so categories may not add to totals. Birth rates are total births per 1,000 total population; fertility rates are total births per 1,000 women aged 15–44]

Area	Number						Birth rate, all races	Fertility rate, all races
	All races and origins ¹	Non-Hispanic white ²	Non-Hispanic black ²	American Indian or Alaska Native total ^{2,3}	Asian or Pacific Islander total ^{2,3}	Hispanic ⁴		
Puerto Rico	39,002	2,828	299	---	---	35,847	10.8	52.8
Virgin Islands	---	---	---	---	---	---	---	---
Guam	*	*	*	*	*	*	*	*
American Samoa	1,077	---	---	---	1,073	---	19.7	83.7
Northern Marianas	---	---	---	---	---	---	---	---

--- Data not available.

* Figure does not meet standards of reliability or precision; less than 75% of data for the area were available as of release of the preliminary file; see Technical Notes of "Births: Preliminary Data for 2005."

— Quantity zero.

¹Includes births to race and origin groups not shown separately, such as white Hispanic and black Hispanic women, and births with origin not stated.

²Race and Hispanic origin are reported separately on birth certificates. Persons of Hispanic origin may be of any race. Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. Forty-four states and the District of Columbia reported multiple-race data in 2013. The multiple-race data for these states were bridged to the single race categories of the 1977 OMB standards for comparability with other states; see Technical Notes of "Births: Preliminary Data for 2013."

³Includes persons of Hispanic, non-Hispanic, and origin not stated, according to the mother's reported race; see Technical Notes of "Births: Preliminary Data for 2013."

⁴Includes all persons of Hispanic origin of any race; see Technical Notes of "Births: Preliminary Data for 2013."

⁵Excludes data for the territories.

NOTE: For information on the relative standard errors of the data and further discussion, see Technical Notes of "Births: Preliminary Data for 2005."
