Question:	An urgent care center is located in its own building or space. These centers can provide services such as x-rays and stitches. During the past 12 months, how many times have you gone to an urgent care center about your health? An urgent care center can provide common vaccinations, testing for or treatment of illnesses. They can also treat illnesses or injuries that require immediate care but are not serious enough to require a visit to a hospital emergency room. This is different from a hospital emergency room. These centers provide care during business hours, evenings, and weekends.
