## Section G – HEALTH BELIEFS

**CHECK ITEM G**  
Refer to PROXY STATUS and age on cover page to determine type of respondent. If proxy is for an adult, GO to H1. If proxy is for a child, GO to G1. If self-respondent, GO to G2.

| G1. Do you make decisions about health care for (Name)? | 1. ☐ Yes  
2. ☐ No – GO to H1 |
|-------------------------------------------------------|--------------------------------------------------|

Next, I will read a few statements. After each, please tell me if you disagree strongly, disagree somewhat, agree somewhat, or agree strongly.

| G2. “If you wait long enough, you can get over most any illness without getting medical care.” (Do you disagree strongly, disagree somewhat, agree somewhat, or agree strongly?) | 1. ☐ Disagree strongly  
2. ☐ Disagree somewhat  
3. ☐ Agree somewhat  
4. ☐ Agree strongly  
5. ☐ UNCERTAIN/NEITHER AGREE NOR DISAGREE |
|--------------------------------------------------------|----------------------------------------------------------|

| G3. “Some home remedies are still better than prescribed drugs for curing illness.” (Do you disagree strongly, disagree somewhat, agree somewhat, or agree strongly?) | 1. ☐ Disagree strongly  
2. ☐ Disagree somewhat  
3. ☐ Agree somewhat  
4. ☐ Agree strongly  
5. ☐ UNCERTAIN/NEITHER AGREE NOR DISAGREE |
|--------------------------------------------------------|----------------------------------------------------------|

| G4. "Doctors never recommend surgery (an operation) unless there is no other way to solve the problem." (Do you disagree strongly, disagree somewhat, agree somewhat, or agree strongly?) | 1. ☐ Disagree strongly  
2. ☐ Disagree somewhat  
3. ☐ Agree somewhat  
4. ☐ Agree strongly  
5. ☐ UNCERTAIN/NEITHER AGREE NOR DISAGREE |
|--------------------------------------------------------|----------------------------------------------------------|

| G5. As you know, there has been much talk about the cost of health care in this country. Some ideas for reducing costs would affect the services people get.  
If it meant that you would pay significantly less for health care, how much would you mind if (Name/you) had to choose (his/her/your) regular doctor — would you mind a lot, a little, or not at all? | 1. ☐ A lot  
2. ☐ A little  
3. ☐ Not at all |
|--------------------------------------------------------|----------------------------------------------------------|

| G6. if it meant that you would pay significantly less for health care, how much would you mind if (Name/you) had to choose (his/her/your) doctor from a list provided by the insurance company — would you mind a lot, a little, or not at all? | 1. ☐ A lot  
2. ☐ A little  
3. ☐ Not at all |
|--------------------------------------------------------|----------------------------------------------------------|

| G7. If it meant that you would pay significantly less for health care, how much would you mind if (Name/you) sometimes saw a nurse instead of a doctor — would you mind a lot, a little, or not at all? | 1. ☐ A lot  
2. ☐ A little  
3. ☐ Not at all |
|--------------------------------------------------------|----------------------------------------------------------|

| G8. If it meant that you would pay significantly less for health care, how much would you mind if (Name/you) had to wait more than a day or two to see a doctor when (Name/you) was/were sick — would you mind a lot, a little, or not at all? | 1. ☐ A lot  
2. ☐ A little  
3. ☐ Not at all |

Vital and Health Statistics series descriptions

SERIES 1. Programs and Collection Procedures—These reports describe the data collection programs of the National Center for Health Statistics. They include descriptions of the methods used to collect and process the data, definitions, and other material necessary for understanding the data.

SERIES 2. Data Evaluation and Methods Research—These reports are studies of new statistical methods and include analytical techniques, objective evaluations of reliability of collected data, and contributions to statistical theory. These studies also include experimental tests of new survey methods and comparisons of U.S. methodology with those of other countries.

SERIES 3. Analytical and Epidemiological Studies—These reports present analytical or interpretive studies based on vital and health statistics. These reports carry the analyses further than the expository types of reports in the other series.

SERIES 4. Documents and Committee Reports—These are final reports of major committees concerned with vital and health statistics and documents such as recommended model vital registration laws and revised birth and death certificates.

SERIES 5. International Vital and Health Statistics Reports—These reports are analytical or descriptive reports that compare U.S. vital and health statistics with those of other countries or present other international data of relevance to the health statistics system of the United States.

SERIES 6. Cognition and Survey Measurement—These reports are from the National Laboratory for Collaborative Research in Cognition and Survey Measurement. They use methods of cognitive science to design, evaluate, and test survey instruments.

SERIES 10. Data From the National Health Interview Survey—These reports contain statistics on illness; unintentional injuries; disability; use of hospital, medical, and other health services; and a wide range of special current health topics covering many aspects of health behaviors, health status, and health care utilization. They are based on data collected in a continuing national household interview survey.

SERIES 11. Data From the National Health Examination Survey, the National Health and Nutrition Examination Surveys, and the Hispanic Health and Nutrition Examination Survey—Data from direct examination, testing, and measurement on representative samples of the civilian noninstitutionalized population provide the basis for (1) medically defined total prevalence of specific diseases or conditions in the United States and the distributions of the population with respect to physical, physiological, and psychological characteristics, and (2) analyses of trends and relationships among various measurements and between survey periods.

SERIES 12. Data From the Institutionalized Population Surveys—Discontinued in 1975. Reports from these surveys are included in Series 13.

SERIES 13. Data From the National Health Care Survey—These reports contain statistics on health resources and the public’s use of health care resources including ambulatory, hospital, and long-term care services based on data collected directly from health care providers and provider records.

SERIES 15. Data From Special Surveys—These reports contain statistics on health and health-related topics collected in special surveys that are not part of the continuing data systems of the National Center for Health Statistics.

SERIES 16. Compilations of Advance Data From Vital and Health Statistics—Advance Data Reports provide early release of information from the National Center for Health Statistics’ health and demographic surveys. They are compiled in the order in which they are published. Some of these releases may be followed by detailed reports in Series 10–13.

SERIES 20. Data on Mortality—These reports contain statistics on mortality that are not included in regular, annual, or monthly reports. Special analyses by cause of death, age, other demographic variables, and geographic and trend analyses are included.

SERIES 21. Data on Natality, Marriage, and Divorce—These reports contain statistics on natality, marriage, and divorce that are not included in regular, annual, or monthly reports. Special analyses by health and demographic variables and geographic and trend analyses are included.

SERIES 22. Data From the National Mortality and Natality Surveys—Discontinued in 1975. Reports from these sample surveys, based on vital records, are now published in Series 20 or 21.

SERIES 23. Data From the National Survey of Family Growth—These reports contain statistics on factors that affect birth rates, including contraception, infertility, cohabitation, marriage, divorce, and remarriage; use of medical care for family planning and infertility; and related maternal and infant health topics. These statistics are based on national surveys of childbearing age.

SERIES 24. Compilations of Data on Natality, Mortality, Marriage, Divorce, and Induced Terminations of Pregnancy—These include advance reports of births, deaths, marriages, and divorces based on final data from the National Vital Statistics System that were published as supplements to the Monthly Vital Statistics Report (MVSR). These reports provide highlights and summaries of detailed data subsequently published in Vital Statistics of the United States. Other supplements to the MVSR published here provide selected findings based on final data from the National Vital Statistics System and may be followed by detailed reports in Series 20 or 21.
