Session 3: In-depth review of cognitive and field test results and experiences

Plan and objectives: Countries that have conducted pre-tests of the WG short question set and members of the data analysis workgroup will present pre-test results. Since time does not permit discussion of all of the individual test results for each question, only a subset of country results will be highlighted for each question. Each country has been asked to make one presentation on a particular question. However, the results from all countries for all questions (combined results) will also be presented. Specific members of the data analysis workgroup have been designated as facilitators for each of the six WG questions. In each section corresponding to the six questions, all results pertaining to the six WG questions will also be considered including the WG sponsored pre-tests, the WHO/ESCAP test, and other testing activities. After each set of

presentations, we will have a discussion of next steps for that question which might include necessary revisions and/or additional testing.
