Poster Sessions

The goal of this year's Poster Sessions is to offer a venue for researchers to present original research on health, health data, and statistics, and provide a forum for informal discussion with interested colleagues.

Student Awards

This year's sessions will include a special focus on students, with the following award opportunities:

- **Student Research Showcase** – Four students who submitted exceptional abstracts have been offered the opportunity to present their research orally in lieu of a poster presentation. The oral presentations will be given during the Student Research Showcase (SS-33), held on Wednesday, August 8th from 10:30 am to 12:00 pm.
 - [Student Research Showcase: Presenter Bios](#)
 - [Abstracts for Oral Presentation](#)
- **Student Poster Prize** – Judges will visit student posters at the times listed in the Poster Session timetables below. Students should be prepared to orally give a 3-5 minute overview of his or her poster and be prepared for 3-5 minutes of question and answer with the judges. Students must stand by their posters during the listed time period, or will be disqualified from the student award competition.

Student posters deemed exceptional will be chosen as finalists for the Outstanding Student Poster Awards. These will be selected by 5:00 pm and will be identified with a finalist rosette. Posters with a finalist rosette should be left up and will be displayed for the remainder of the Conference. All student poster finalists should plan to attend the Plenary Session on Wednesday, August 8 from 8:30am-10:00am. During this Plenary Session, the top 3 Outstanding Student Posters will be announced and the presenters will be recognized with an award and a photograph taken with Dr. Edward Sondik, the Director of the National Center for Health Statistics.

Note: To be eligible for one of these student awards, the first author MUST be a student at the time of submission.
