- HHS Office of the Assistant Secretary for Planning and Evaluation (ASPE)

## Contributing agencies and departments

- CDC's National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP)
- CDC's National Center for Immunization and Respiratory Diseases (NCIRD)
- Agency for Healthcare Research and Quality (AHRQ)
- U.S. Department of Veterans Affairs (VA)

# NSRCF Provider Association Supporters

**Board & Care Quality**

**A Publication of Reisacher Petro & Associates**

# NSRCF Primary Goals

- 1. Estimate the size of the U.S. industry**
- 2. Determine the characteristics of communities**
- 3. Determine the characteristics of residents**

# NSRCF Content

- Community
  - Community Characteristics
  - Staffing
  - Services Offered
  - Operating Procedures and Practices
  - Facility-level Distribution of Resident Characteristics
  - Administrator Characteristics

# NSRCF Content

- Resident
  - Demographics
  - Health Status and Health Care Use
  - Cognitive and Physical Functioning
  - Services Used
  - Involvement in Activities
  - Living Arrangements
  - Monthly Charges
  - Medicaid Coverage Status

# NSRCF Eligibility Definition

- 4 or more beds;
- primarily an adult population;
- at least 1 resident at time of interview;
- licensed, registered, listed, certified, or otherwise regulated by the state to...
  - provide room and board with at least 2 meals a day;
  - provide around-the-clock on-site supervision; and
  - offer help with personal care OR health care-related services.

Exclusions: Nursing homes and facilities exclusively serving adults with severe mental illness or ID/DD.

# NSRCF Data Collection

- Conducted interviews April – November 2010
- Collected data on 2,302 communities and 8,094 current residents
- Weighted response rates
  - Community-level: 81%
  - Resident-level: 99%
- *Design and Operation of the 2010 National Survey of Residential Care Facilities*

# Residential care facilities and residents, by facility size: United States, 2010

NOTE: Estimates may not add to totals because of rounding.

SOURCE: CDC/NCHS, National Survey of Residential Care Facilities, 2010

# Residential care facilities, by co-location status with other types of providers: United States, 2010

NOTE: Figure excludes cases with missing data.

A small number of facilities were located on a property with a hospital. However, the number did not meet NCHS standards for reliability and are not presented here.

SOURCE: CDC/NCHS, National Survey of Residential Care Facilities, 2010.

# Residential care facilities, by selected services, United States, 2010

NOTE: Figure excludes cases with missing data.

SOURCE: CDC/NCHS, National Survey of Residential Care Facilities, 2010.

# Residential care facilities, by selected aspects of access to residential care: United States, 2010

NOTE: Figure excludes cases with missing data.

SOURCE: CDC/NCHS, National Survey of Residential Care Facilities, 2010.

# Residential care facilities, by percentage of residents receiving assistance with selected activities of daily living, United States, 2010

■ At least half of all residents in the facility

NOTE: Figure excludes cases with missing data.

SOURCE: CDC/NCHS, National Survey of Residential Care Facilities, 2010.

[NCHS Home](#) > [Surveys and Data Collection Systems](#) > [National Health Care Surveys](#)

In 2010, the Centers for Disease Control and Prevention's National Center for Health Statistics (NCHS) conducted a new study of residential care communities. The National Survey of Residential Care Facilities (NSRCF) is a first ever survey of residential care providers.

Included are residential care facilities; assisted living residences; board and care homes; congregate care; enriched housing programs; homes for the aged; personal care homes; and shared housing establishments that are licensed, registered, listed, certified, or otherwise regulated by a state. NSRCF is designed to produce national estimates of these places and their residents.

# National Study of Long-Term Care Providers

## Major Goals

1. Estimate the national supply of paid, regulated LTC providers
2. Estimate key policy-relevant provider characteristics
3. Estimate the national use of these providers
4. Estimate key policy-relevant user characteristics
5. Within the above goals, provide state estimates where feasible
6. Compare types of providers

About NSLTCP

Listserv

[NCHS Home](#) > [Surveys and Data Collection Systems](#) > [National Health Care Surveys](#)

The National Center for Health Statistics is launching a new National Study of Long-Term Care Providers (NSLTCP). NSLTCP will replace the previously conducted [National Nursing Home Survey](#), [National Home and Hospice Care Survey](#), and most recently, [National Survey of Residential Care Facilities](#). NSLTCP will provide nationally representative statistical information about the supply and use of paid, regulated long-term care (LTC) providers in the United States. This study, which will be conducted every other year, is intended to enable efficient and timely monitoring of the diverse and evolving field of LTC and to help address the nation's information needs to inform future LTC policy.
