Wyoming	*4.9 (1.79)	20.8 (3.99)	76.1 (4.28)

\* Estimate has a relative standard error (RSE) greater than 30% and less than or equal to 50% and should be used with caution as it does not meet standards of reliability or precision.

† Estimate has an RSE of greater than 50% and is not shown.

<sup>1</sup> Estimates are presented for fewer than 50 states and the District of Columbia for children aged 0–17 due to considerations of sample size and precision.

<sup>2</sup> A person was defined as uninsured if he or she did not have any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. A person was also defined as uninsured if he or she had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>3</sup> Includes Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>4</sup> Includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, or purchased through local or community programs. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of persons were covered by both public and private plans and were included in both categories.

<sup>5</sup> Includes all 50 states and the District of Columbia.

NOTE: Data are based on household interviews of a sample of the civilian noninstitutionalized population.

DATA SOURCE: CDC/NCHS, National Health Interview Survey, 2014, Family Core component.
