

2022 HAI Rebaseline Blast Email

Email sent to: all Patient Safety Component NHSN users

Email sent on: April 23rd 2025

The NHSN Rebaseline Team has an exciting update! The second group of Standardized Infection Ratio (SIR) reports using the new 2022 baseline will be available in the NHSN Patient Safety Component soon. This group will consist of reports for Acute Care Hospitals for the following healthcare-associated infections (HAI):

- Central Line-Associated Bloodstream Infection (CLABSI)
- Catheter-Associated Urinary Tract Infection (CAUTI)
- *C. difficile* (CDI) LabID Event

A follow-up email will be sent to all NHSN Patient Safety Component users once the new reports are available. This subsequent email will provide information about upcoming training opportunities and updated educational materials that will help NHSN users utilize and interpret these new reports.

A quick reminder that the new SIR reports are being made available in the NHSN application for internal use by your facility and/or Group. The 2015 baseline SIR reports will continue to be available in NHSN for facility and group users.
