Hemovigilance Module: Annual Facility Survey Question 17 – Generate totals in the Analysis feature with denominator data

1. Select the Hemovigilance Denominator Table Line Listing from the Analysis Reports menu, and Modify Report.

2. In the Time Period tab on the menu bar, choose the “SummaryYr” data variable, and input the year of interest.
Hemovigilance Module: Annual Facility Survey Question 17 – Generate totals in the Analysis feature with denominator data

3. Under the Display Variables tab, make sure year, units, aliquots, and summaryYr are selected.

4. Run the report. Most of the information needed for question 17 of the Annual Facility Survey can be found in this table (within the red boxes). Pool size and number of units of granulocytes and lymphocytes are not recorded monthly or found elsewhere in NHSN.
