**Hemovigilance Module: User guide for reporting DSTR as Other reaction**

**NHSN user support**: nhsn@cdc.gov

---

**Add Adverse Reaction**

### Investigation Results (Use case definition criteria in protocol.)

- **Adverse reaction**: OTHER - Other
- **Specify**: DSTR (Delayed Serologic Transfusion Reaction)

#### List relevant lab testing:

<table>
<thead>
<tr>
<th>Name</th>
<th>Date test performed</th>
<th>Test results</th>
</tr>
</thead>
<tbody>
<tr>
<td>DAT</td>
<td>11/01/2017</td>
<td>Positive</td>
</tr>
<tr>
<td>Antibody screen</td>
<td>11/01/2017</td>
<td>Positive Anti-D</td>
</tr>
<tr>
<td>Check for hemolysis</td>
<td>11/01/2017</td>
<td>No hemolysis in pre-bx sample</td>
</tr>
</tbody>
</table>

#### Severity

- Symptomatic treatment only
- Life-threatening
- Congenital anomaly or birth defect(s)
- Other medically important condition

#### Imputability

- Select "unknown or not stated" severity, despite DSTRs have no clinical symptoms and cannot be graded.

- **Which best describes the relationship between the transfusion and the reaction?**
  - Conclusive evidence exists that the adverse reaction can be attributed to the transfusion.

- **Did the transfusion occur at your facility?** Y - Yes

---

**Comments**

DSTR ENTERED AS OTHER REACTION BECAUSE IMPUTABILITY TIMEFRAME WAS NOT MET.
