Using the “Line Listing – HCP Flu Vaccination Data for CMS ASC PPS” Output Option*

The NHSN Analysis Output Option, “Line Listing – HCP Flu Vaccination Data for CMS ASC PPS” was originally created to allow facilities to review data that were submitted to CMS on their behalf. It’s important to keep in mind the following as you begin to use this report:

a. This report will only include in-plan healthcare personnel (HCP) influenza vaccination data for each influenza season, starting with the 2014/15 season.

b. This output option represents a line listing for each facility, not each CCN. If your facility shares a CCN with one or more facilities, this line listing will only represent the data that your facility has contributed to the overall vaccination data for all facilities that share the CCN. You may wish to use the Group feature in NHSN to view HCP influenza vaccination data for the facilities that share a CCN. More information about the Group function can be found at [http://www.cdc.gov/nhsn/group-users/index.html](http://www.cdc.gov/nhsn/group-users/index.html).

c. The data in this report will represent data current as of the last time you generated datasets.

d. The information in this document should be used in conjunction with the document, “Helpful Tips for Ambulatory Surgery Centers to Report Healthcare Personnel (HCP) Influenza Vaccination Summary Data through NHSN.”

Example of the “Line Listing – HCP Flu Vaccination Data for CMS ASC PPS” Output Option:

1. On the NHSN Landing Page, select the Healthcare Personnel Safety (HPS) Component in the Component dropdown menu. All data entry and analysis for the HCP influenza vaccination summary is done through the HPS Component.

2. Generate new datasets within the HPS Component to make sure that you are analyzing the most up-to-date data reported to NHSN by your facility. To generate datasets, go to Analysis > Generate Data Sets, and then click “Generate New.” If you have generated datasets previously, click the OK button on the pop-up window that is displayed to create new datasets with your facility’s most recent data.

3. Go to Analysis > Reports, and navigate through the following folders: CMS Reports > Ambulatory Surgery Centers (ASCQR). Click on “Line Listing – HCP Flu Vaccination Data for CMS ASC PPS,” and then click on “Run Report,” as shown below:

*Beginning with the 2018-2019 influenza season, submission of ASC data is no longer required by CMS. However, the CMS Line Listing report is still available for facility use in NHSN.
4. The results will include data from all influenza seasons. By default, the results will appear in a separate HTML window. If a second window does not appear, please be sure to check your pop-up blocker and allow pop-ups from *.cdc.gov.

5. A single table titled “Line Listing for HCP Flu Vaccination Data for CMS ASC PPS” will be presented in the pop-up HTML window. The table presents HCP vaccination data by influenza season, stratified by HCP category (employees, licensed independent practitioners, adult students/trainees and volunteers), and all three categories combined.

6. Facilities have the option to report influenza vaccination of other contract personnel. If your facility chooses to report influenza vaccination summary data for other contract personnel, these data will not be displayed in the Line Listing. Also, please note that the numerator category of “unknown vaccination status” will not be displayed in the Line Listing.
Updated March 2019

Sample output for the “Line Listing – HCP Flu Vaccination Data for CMS ASC PPS” output option is displayed below:

**National Healthcare Safety Network**

**Line Listing for HCP Flu Vaccination Data for CMS ASC PPS**

As of: March 18, 2014 at 3:45 PM

Date Range: All HCW VaccFils:CMS_ASC0R

</table>

The first three rows of the table display the HCP influenza vaccination data for each individual HCP category. The fourth row of the table displays the HCP influenza vaccination data for all three required HCP categories combined.

From the fourth row of this output, we can conclude the following for the 2014/15 influenza season:

- 1 healthcare worker declined influenza vaccine *(declinations)*
- 1 healthcare worker reported a medical contraindication to the influenza vaccine *(contraindications)*
- 22 HCP were vaccinated outside of the facility *(vaccEW)*
- 30 HCP were vaccinated at the facility *(vaccHere)*
- 55 HCP worked at the facility for at least 1 day during the reporting period *(working)*
- The HCP influenza vaccination percentage for all HCP who worked at the facility for at least 1 day during the reporting period was 95% *(pctVacc)*
- 52 total HCP were vaccinated *(totVacc)*
- The 95% confidence interval around the HCP influenza vaccination percentage was (86%, 99%) *(pctVaccCI)*

7. If this table is not displayed when you click the “Run” button, be sure that you have included HCP influenza vaccination summary reporting in your HPS Component Monthly Reporting Plan for the influenza season of interest (Reporting Plan > Find) and that you have entered HCP influenza vaccination summary data for that influenza season (Flu Summary > Find).

REMEMBER: When you make changes to your data, regenerate your datasets to review this output option with the most up-to-date data in NHSN.
