Subject: NHSN version 8.2 now available

Dear NHSN Users,

NHSN version 8.2 was released this weekend. There are many new additions with this release, including the introduction of the Dialysis Component for Outpatient Dialysis Facilities, the Antimicrobial Resistance Option in the AUR Module, and Unusual Susceptibility Profile Alerts. Please carefully review the attached release notes for important details about the changes found in NHSN version 8.2.

NOTE: Due to the changes in NHSN 8.2, users who wish to analyze data must regenerate datasets prior to running any of the Analysis Output Options.

If you have questions or comments, please contact us at nhsn@cdc.gov.

Sincerely,

The NHSN Team
