

Dear NHSN Users,

NHSN version 7.0 was released this weekend. Please review the attached [release notes](#) for important details about the changes found in NHSN version 7.0.

Additionally, CDC will conduct two webinars on the new Healthcare Personnel Vaccination Module for the Healthcare Personnel Influenza Vaccination Summary that is introduced in NHSN version 7.0. The webinars will be held on Wednesday, October 3 (12 PM-1PM ET) and Thursday, October 11 (2 PM-3 PM ET). Participants will learn about NHSN requirements for reporting Healthcare Personnel Influenza Vaccination Summary data. Specifically, each webinar will cover information on data collection and data entry for the NHSN module.

The same content will be presented in both webinars; therefore, users will only need to choose one date and register for that particular webinar. To register, please click on the following link: <http://www2.cdc.gov/vaccines/ed/nhsn/>. For those unable to participate in a webinar, a re-cast will be available shortly after each webinar.

If you have questions or comments, please contact us at nhsn@cdc.gov.

Thank you,

The NHSN Team
