

NHSN v9.3.1 (July 16, 2019) Release Notes

Changes to All Components

Maintenance and Infrastructure	This release was devoted to infrastructure updates and back end processing updates.
Resolved Defects	As with every release, we resolved many defects. For resolved Analysis and Reporting defects, remember to regenerate datasets to be able to be able to take advantage of any associated corrections.

Update to LTCF Component

LTC Dashboard	The Long Term Care team has created a Dashboard in their NHSN component. The dashboard will display interactive graphs and tables based on the data reported. It allows for immediate visualization of rates and counts for each facility and is a visual reminder to users how accurate and consistent data into NHSN improves outcomes. The LTC dashboard can be found on the NHSN Home page when the users log in. Facility users can view and print facility specific data without having to create custom graphs and charts within the Analysis Reports.
