

This weekend, NHSN version 6.6.1 was released. Several changes to the application have been made. More information can be found on page 1 of the attached document.

Facilities with inpatient rehabilitation locations mapped in NHSN will be required to make an update in their NHSN location manager as a result of the release. Please refer to the guidance that begins on page 2 of the attached document if you have an inpatient rehabilitation location mapped, or if you need to add one to comply with CMS reporting requirements for inpatient rehabilitation facilities and locations that begin in October 2012.

Please contact the help desk at nhsn@cdc.gov with any questions or comments.

Thank you,
The NHSN Team
