

Demo Exercise Results: Line List

Output:

The line list displays one row of data for each CLABSI event. Notice that the column headings include descriptive variable labels. In addition, since the 'page by' variable was used, one CLABSI line list was created for each of the 2 medical/surgical ICU locations in the facility.

Note: You can edit the variables that are displayed on the line list by selecting the first "Modify List" link on the Line List Modification Screen.

National Healthcare Safety Network

Line Listing for All Central Line-Associated BSI Events

As of: May 1, 2013 at 11:03 AM

Date Range: CLAB_EVENTS evtDateYM 2012M01 to 2012M06

Location=2 MSICU
