NHSN Analysis FAQs: How do I create a line list of procedures?

1. Navigate to the “Advanced” → “Procedure-level Data” folder and click “Line Listing – All Procedures”. On the drop-down menu, select “Modify Report”.

2. Make any desired modifications to time period and/or other criteria (e.g., limit to specific procedures).

3. Click the “Display Options” tab and use the options to select variables for your line list, sort your line list, and determine a “Page by variable”. TIP: the “Page by variable” will provide you with one list per value. For example, if “dob” is selected, you will obtain one line list per date of birth.

4. Make any additional modifications to your report and click the “Run” button. Your output will appear with all appropriate modifications.

National Healthcare Safety Network
