NHSN DIALYSIS EVENT

WB2961

PROGRAM DESCRIPTION: This activity is designed to teach healthcare personnel how to collect and report dialysis event infection data to the National Healthcare Safety Network (NHSN), analyze dialysis facility's incidence of infections, and use the data to improve performance and enhance patient safety.

OBJECTIVES:

At the conclusion of the session, the participant will be able to:
1. Describe the scope of the problem of infections among hemodialysis patients.
2. Define key terms, Dialysis Event definitions and protocols used in data collection and reporting Dialysis Events.
3. Describe how to collect event data using Dialysis Event form.
4. Explain how Dialysis event rates are calculated and reported to promote performance improvement.
